Bringing daylight and fresh air to homes for over 75 years

At VELUX® we know how important it is to start planning for daylight in a project as early as possible.

For decades we have led the way in designing innovative roof windows, blinds, shutters and accessories, all of which help create bright and welcoming spaces.

VELUX roof windows can bring twice the amount of daylight* into your extension than vertical glazing of the same size, or transform your loft into a brand new space.

You can also enjoy optimum comfort in your home thanks to VELUX ACTIVE, our smart home solution that works with VELUX INTEGRA® electric and solar powered products to automatically control the light, ventilation and indoor climate of your home.

In keeping with our commitment to developing exciting new products, this year we are launching the VELUX INTEGRA® electric top-hung roof window. With all the benefits of the manual top-hung roof window, this product now comes in an electric option that can be paired with VELUX ACTIVE.

Explore our full range of sizes, options and finishes – all backed by the expertise and support of our technical team, and bring some truly innovative ideas to your next project.

Improve your home life with daylight

Why VELUX roof windows?

When extending your home, you may think that bi-fold doors will bring in enough daylight. However, extensions move the light source away from the original building, meaning light won't reach very far inside your existing space.

The solution? By introducing VELUX roof windows you can bring in twice as much daylight as vertical windows of the same size, allowing natural light to penetrate deeper into your home.

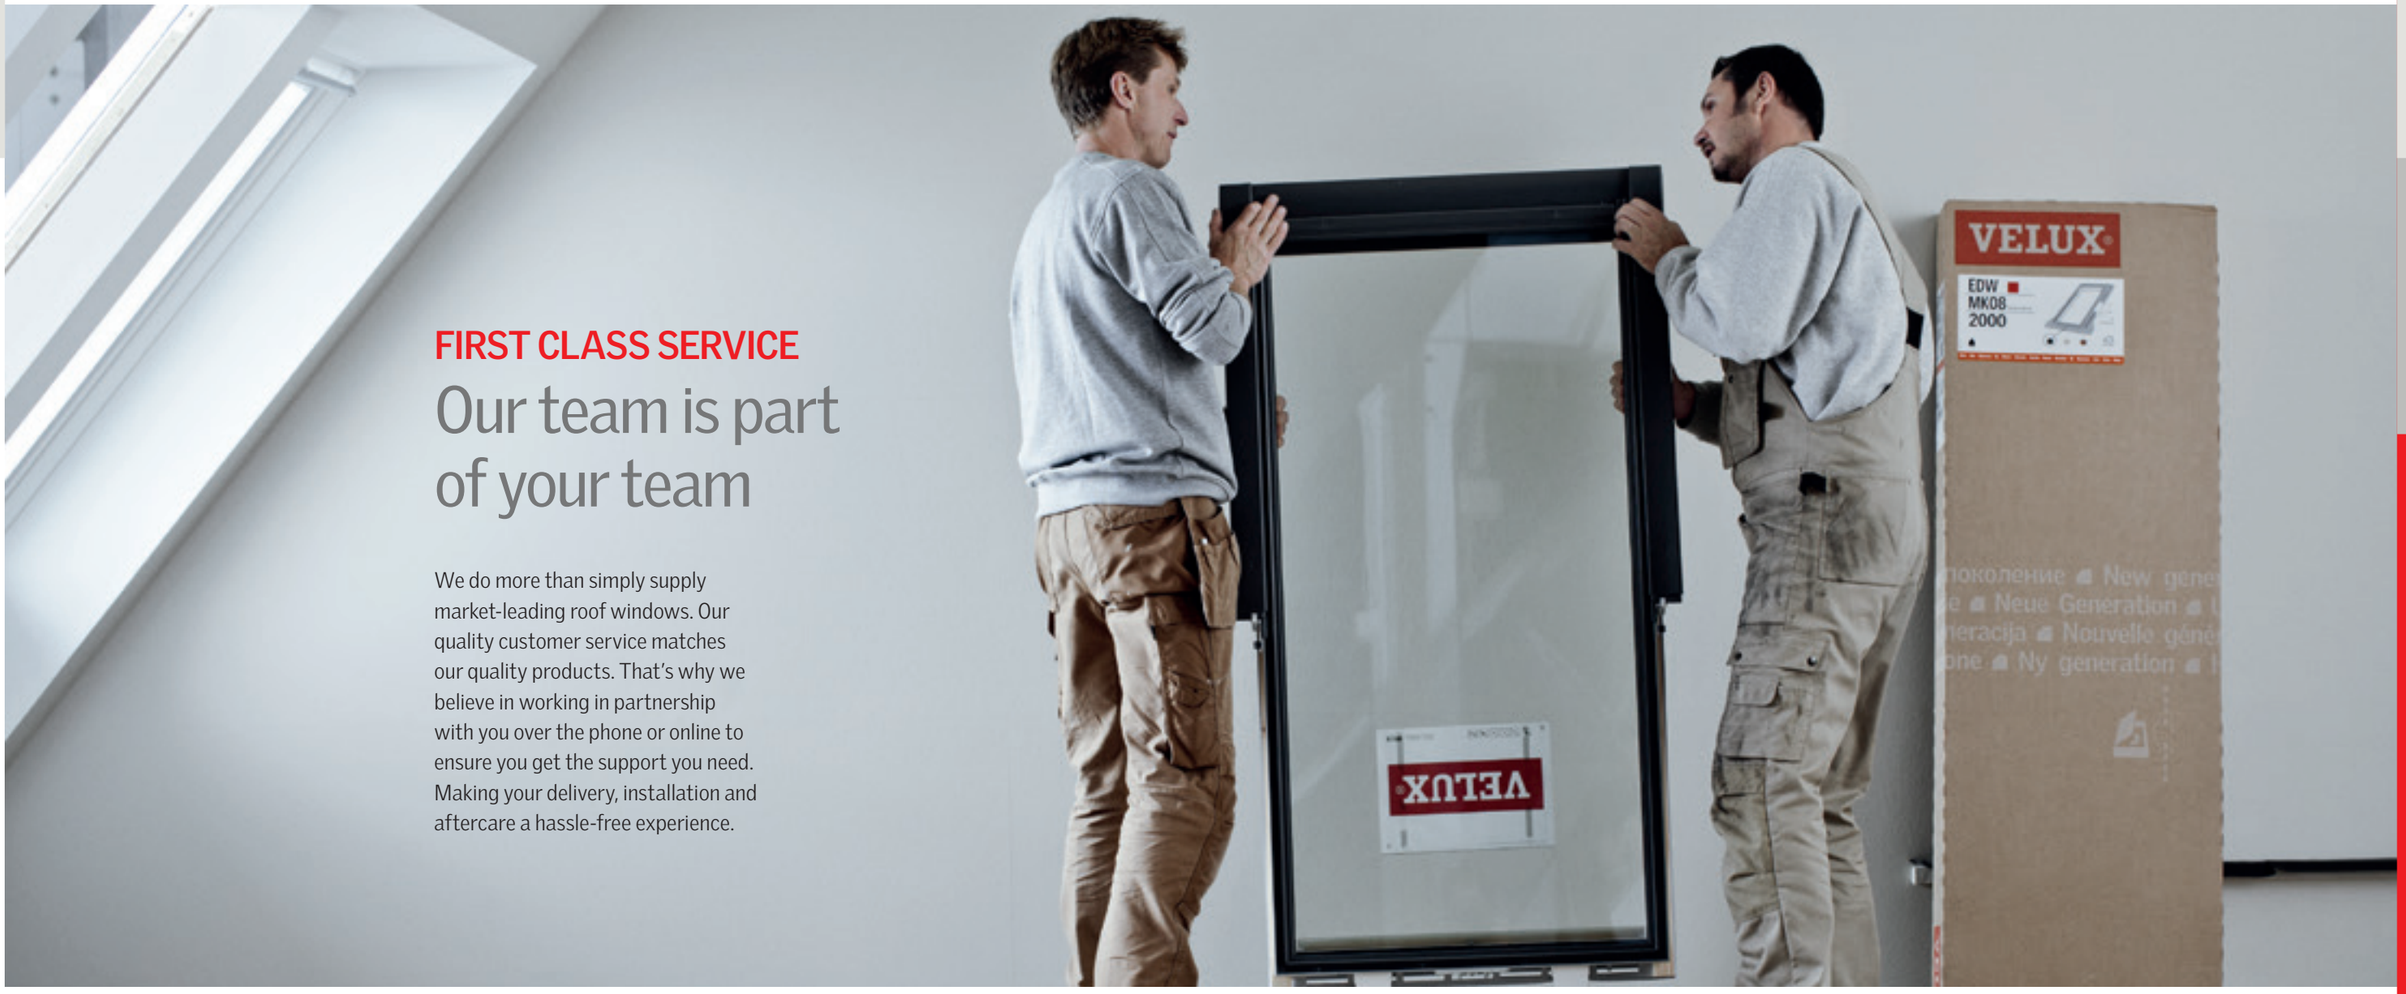
***TIP:* If your extension is north facing, VELUX roof windows are even more important. In some cases, they're the only way to get sunlight shining directly into the room.**

The right combinations

Combining your VELUX roof windows with vertical glazing is essential as it allows daylight to enter your home from different angles. The extension featured here does exactly that. Now this stunning room benefits from increased daylight levels from dawn till dusk.

***TIP:* To ensure enough daylight, the glazing in your project should be equivalent to 15-20% of the whole room's floor space.**

So whether you're at the beginning of your extension journey, or simply looking to bring more daylight into your current space, VELUX roof windows are the right choice for your home.



FIRST CLASS SERVICE

Our team is part of your team

We do more than simply supply market-leading roof windows. Our quality customer service matches our quality products. That's why we believe in working in partnership with you over the phone or online to ensure you get the support you need. Making your delivery, installation and aftercare a hassle-free experience.

The world's number 1 in roof windows because...

- We've been at the very forefront of innovative design in roof windows for over 75 years.
- Our products are tried, tested and guaranteed.
- We use cutting edge manufacturing techniques to ensure quality and consistency.
- We have a zero defect philosophy embedded into our workforce, as well as stringent final inspections, ensuring products arrive with you in perfect condition.
- VELUX products are rigorously tested in Northern Europe's largest wind tunnel and are backed by a comprehensive guarantee.

The tools to build your project

We offer you the best products on the market. We also understand the importance of helping you choose the best solution for your project. Our first class marketing materials provide inspiration and give you opportunities to enhance and expand your project.

Reliable logistics

With a vast amount of our products available in two working days, you can rely on us to deliver quickly and on time.

Dedicated field support

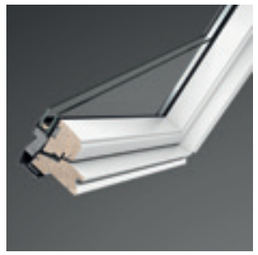
Our team in the UK and Ireland strive to constantly improve the service you receive. As well as advice by phone, our nationwide service technicians and field sales teams are happy to offer hands-on support throughout the year.

Our product features at a glance

Our highly engineered roof windows have the latest technology built in. Our research and development teams are continuously refining products to improve performance.

The following features come as standard with all of our roof windows and are designed to make installation and operation easier, as well as ensuring our products look their best.

We are the only roof window manufacturer offering safety glazing as standard



Safety glazing prevents glass from falling into your home if broken, and is standard in all of our roof windows (excluding rooflights for uninhabited spaces). Glazing options include noise reduction, privacy and added insulation.

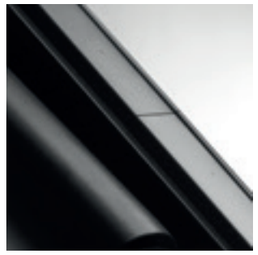
Our high quality pivot hinges are designed with innovative technology, ensuring stability throughout the life of your product.

VELUX ThermoTechnology™ features high performance materials in the roof window construction. This ensures you use less energy whilst keeping the warmth in your home.

For easy cleaning of the outside pane, the barrel bolt locks the roof window in a 180° position. Now both hands are free for you to clean the outer pane easily and safely from within the room.

The same bracket is used for both recessed and standard installations. A simple red and blue line system shows where the bracket should be installed. You can be confident of a straightforward installation every time.

The unique brushed aluminium ventilation bar makes it possible to let fresh air into your home, even when the roof window is securely closed or when you are away or sleeping, without having to worry about security or bad weather.



Click-on covers make your installation easier, faster and safer, by reducing the number of screws required onsite.

Our pre-installed, patented mounting brackets come as standard on every new VELUX roof window and fit any of our VELUX blinds, making installation as straightforward as possible.

Pick&Click!®

The finishing touch to suit your home

THREE INTERNAL FINISH OPTIONS

Lighter, brighter modern living spaces are more popular than ever. To ensure you have the means to make the most of your project, we offer three internal finish options. All finishes have the same high VELUX quality combined with:

- laminated safety glass as standard
- straightforward installation
- excellent value for money
- short delivery time.

WHITE POLYURETHANE FINISH

- Wooden core encased in moisture-resistant white polyurethane. The first choice for humid rooms such as kitchens and bathrooms.
- No visible joints, so dirt can't accumulate in the corners.
- Maintenance-free, which is ideal for out-of-reach areas.
- Thermally moulded timber core delivers improved insulation.

WHITE PAINTED FINISH

- Painted before assembly for a flawless finish and outstanding durability.
- Bright white finish with discreet wood grain matches perfectly with modern interiors.
- Lower maintenance than pine finish roof windows.
- Highly UV resistant, water-based breathable paint to preserve a crisp, bright look.

PINE FINISH

- Matches perfectly with traditional interiors.
- Protective triple coat clear lacquer helps to preserve the timber of the window.

Explore the possibilities...

Every VELUX product you choose will do a great job. Before you start, it's worth considering all the available solutions for the space you are creating. By choosing the right operation, glazing and blinds, you can make a big difference to your project and how the room functions.

Find the right roof window for you at **velux.co.uk/configurator**

Operation

Centre-pivot

Centre-pivot roof windows are operated via the top control bar, making it easy to open, even with furniture below the roof window.

Top-hung

Top-hung roof windows are operated by a handle at the bottom and open outwards, allowing you to take advantage of uninterrupted views and a feeling of extra space.

VELUX INTEGRA®

For easy ventilation at the touch of a button, you can control VELUX INTEGRA® solar powered or electric roof windows remotely. They're the ultimate choice for fresh air and better indoor comfort.

See all our roof window options on pages 20-53.

Glazing

Safety glazing – 70 pane

U-value 1.3 W/m²K

Laminated safety glazing comes as standard. In case of accidental breakage, this prevents glass falling into your room.

Noise reduction glazing – 60 pane

U-value 1.3 W/m²K

With all the benefits of 70 pane, plus noise reduction to keep out traffic, rain and hail noise for a perfect night's sleep.

Energy efficiency glazing – 66 pane

U-value 1.0 W/m²K

Triple glazing with enhanced energy efficiency, allowing your roof window to keep heat in from the sun.

Blinds and shutters

Energy and duo blackout blinds

Energy blinds feature double-pleated blackout fabric for insulation, while our duo blinds give you blackout and pleated blinds in one, offering multiple ways to control daylight in your home.

VELUX INTEGRA® electric and solar operated blinds

Enjoy full control of daylight at your fingertips – choose from blackout, roller, pleated and light dimming energy blinds in a full range of colours.

Awnings and shutters

VELUX awning blinds provide solar heat reduction in sunny weather while VELUX roller shutters offer additional energy saving and noise reduction with the added bonus of complete blackout.

*per roof window.

Discover the full blinds range on pages 62-72.

Extension – A beautifully light living space

VELUX INTEGRA® electric roof windows transformed this room into a stunning and bright living space. Without roof windows, this room lacked direct sunlight because light from vertical patio doors has a limited reach. After VELUX roof windows were planned into this project, they brought in twice as much daylight as vertical glazing of the same size – now it's a welcoming kitchen with room to cook, entertain and spend time with family.

Featured roof windows: GGU PK10 007021U

VELUX RECOMMEND

VELUX INTEGRA®

Electric roof windows give you control at the touch of a button, meaning getting rid of unwanted humidity from cooking is easy.

Find out more on p24 ➔

WHITE POLYURETHANE

Moisture-resistant and maintenance-free, perfect for humid kitchens.

70 PANE

Safety glazing will prevent glass falling into your home in case of breakage.

AND REMEMBER...

You can control the amount of daylight and the temperature within a room by adding a VELUX blind or shutter.

PLEATED BLIND

Available in electric or solar powered versions, these blinds are easily operated by a pre-paired wall switch and provide privacy, whilst bathing the room in soft light.

Find out more on p69 ➔

For hassle-free solutions, see our extension bundles on p34 ➔

Visit velux.co.uk/extensions to request a copy of our mini-guide, explore our before and after gallery and learn tips and tricks on how to make the most of your space.

Flat roof extension – Adding the natural daylight you're looking for

This gloomy flat roof kitchen was transformed using a VELUX curved glass rooflight. Filling the room with fresh air and daylight, our rooflights instantly renewed this space. The curved glass rooflight is out-of-reach, but because it's a VELUX INTEGRA® electric rooflight, the control is at your fingertips as it can be opened or closed remotely at a moment's notice.

Featured roof windows: CVP 100150 0673QV combined with an ISD 100150 1093

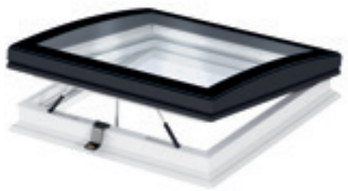
VELUX RECOMMEND

VELUX CURVED GLASS ROOFLIGHTS

The innovative and unique glass-to-edge curved design maximises daylight entering your home, while providing all the functional benefits of a traditional dome.

Electric operation is recommended to provide ventilation at your fingertips.

Find out more on p42 ➔



AND REMEMBER...

You can control the amount of daylight and temperature within a room by adding a VELUX blind.

LIGHT-DIMMING ENERGY BLIND

Available in electric and solar powered versions, our light-dimming energy blinds come with pleated cloth, offering extra insulation when closed.

Find out more on p68 ➔

Visit velux.co.uk/extensions to request a copy of our mini-guide, explore our before and after gallery and learn tips and tricks on how to make the most of your space.

Loft conversion – Fill your bedroom with daylight

This bright and airy bedroom was created by transforming an unused loft space. Installing both sloping and fixed VELUX roof windows not only adds a real wow factor, but it dramatically increases the level of daylight flooding into the room. As well as a means of escape during an emergency, these top-hung roof windows allow for stunning, uninterrupted views.

Featured roof windows: GPL PK08 2060 combined with a GIL PK34 2060 with DKL PK08 0705 & DKL PK04 0705 blackout blinds

Download the **VELUX MyDaylight App** to your phone and visualise how your own loft space could look with added daylight through the roof.

VELUX RECOMMEND

TOP-HUNG

Enjoy panoramic, uninterrupted views.

Find out more on p22 ➔

WHITE PAINTED

Matches perfectly with modern interiors.

60 PANE

Noise reduction glazing is perfect for a good night's sleep.

AND REMEMBER...

You can control the amount of daylight and the temperature within a room by adding a VELUX blind or shutter.

BLACKOUT BLIND

Available in electric and solar powered versions, our blackout blinds come in 24 colours to complement any room and offer almost complete blackout for a good night's sleep.

Find out more on p64 ➔

For hassle-free solutions, see our loft bundles on p32 ➔

Replacement roof windows – It's easier than you think

Breathe new life into your space by replacing your old VELUX roof windows. Our white painted roof windows are specially designed to suit modern interiors. The same standard VELUX sizes are available, and can usually be fitted quickly and easily from inside the room, without disrupting the current internal finish.

Featured roof window on right: GGL MK08 2060.

Certified Installer VELUX

velux.co.uk/findaninstaller

ISSUE	SOLUTION
Do your old pine roof windows no longer match your modern interior?	Replacing pine roof windows with white painted ones will offer a much brighter and contemporary feel to your space.
Are your roof windows in an out-of-reach location?	Installing VELUX INTEGRA® solar powered or electric roof windows means you can open or close your roof windows at the touch of a button.
Does replacing your roof windows sound time consuming?	Choosing the VELUX roof window that's right for you is hassle-free, and can often be installed in 4 hours.

Find out more about replacement roof windows on p20-27 →

For more inspiration...
To find the best replacement roof window for you, visit **velux.co.uk/replacement** and use our replacement configurator.

VELUX BLINDS

Our collection of blinds feature an extensive range of designs and finishes, and our Pick&Click!™ system means they can be fitted in minutes.

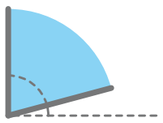
- All roof windows have a delivery time of 2 days except '66' pane windows and GGL 206030 which are 11 days.
- Delivery time is in working days from receipt of orders placed before 4pm (UK) and 11.30am (NI).

*Anti-dew coating reduces number of hours external condensation is present.

Roof pitch



15°-90°

Suitable for roof pitches between 15° and 90°.

Operation

ELECTRIC

- Operate your roof windows with a convenient wall switch.
- Fully integrated motor which runs almost without a sound.

SOLAR POWERED

- All the same features as VELUX INTEGRA® electric roof windows, but powered by the sun.
- PV solar cell on external window frame requires exposure to sunlight.

BENEFITS

- Ideal for out-of-reach areas.
- VELUX INTEGRA® roof windows offer control at your fingertips and provide fresh air, better indoor comfort and home security.
- Rain sensors feature on all VELUX INTEGRA® roof windows, automatically closing in the event of rain.
- Works together with VELUX ACTIVE for a smarter way to achieve a healthier indoor climate.

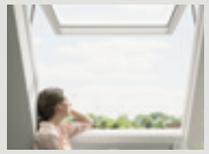
Benefits of VELUX INTEGRA® electric top-hung roof windows



SPECTACULAR VIEWS

Full 45° opening allows for stunning views in all situations and creates a balcony-like feeling that fills your space with natural daylight.

TWO OPERATIONS IN ONE

Enjoy the benefits of two opening options thanks to hybrid functionality, with top-hung operation for unobstructed panoramic views and centre-pivot operation for easy cleaning.

VELUX INTEGRA®

Easily open and close your roof window at the touch of a button with a convenient wall switch. To keep your home dry, our VELUX INTEGRA® roof windows also automatically close in the event of rain.

SMART OPERATION

For a healthier indoor environment, add VELUX ACTIVE with NETATMO for smart sensor-based operation and app-control.

VELUX ACTIVE

For a smarter, healthier home

Featured: GGL MK08 207030 combined with full VELUX ACTIVE kit

VELUX ACTIVE

VELUX ACTIVE works together with your VELUX INTEGRA® electric or solar powered roof windows, blinds and shutters, adjusting them automatically so your family enjoys a healthier indoor climate.

Sensor-based ventilation

Smart sensors monitor temperature, humidity and CO^2 levels, allowing VELUX ACTIVE to intuitively open and close your VELUX INTEGRA® products.

Safe and secure

Tap the departure switch on your way out of the house to close your VELUX INTEGRA® products. This will leave them in the secured ventilation position – for security and peace of mind.

Control from your smartphone

The VELUX ACTIVE app means you can operate your VELUX INTEGRA® products yourself from anywhere in the world, putting you in complete control.

Voice activation option

Apple HomeKit® compatibility lets you use voice control to operate your VELUX INTEGRA® products for complete convenience.

Easy installation

Designed to be installed quickly and easily by homeowners – if you already have VELUX INTEGRA® products, the VELUX ACTIVE kit comes with everything you need to install the system yourself.

VELUX ACTIVE

Smart sensor-based operation of your VELUX roof windows, blinds and shutters.

with
NETATMO

No need to worry about humidity in your kitchen. VELUX ACTIVE smart sensors will automatically open your roof windows to ventilate your home.

The kit includes:

- **VELUX ACTIVE indoor climate sensor**
- **VELUX ACTIVE departure switch**
- **VELUX ACTIVE gateway**
  Interprets the information from the indoor climate sensors and instructs the VELUX INTEGRA® products to open or close.

Additional components:

Extra components can be purchased separately if you have more than one room with VELUX INTEGRA® products, or if you would like a departure switch for each exit door.

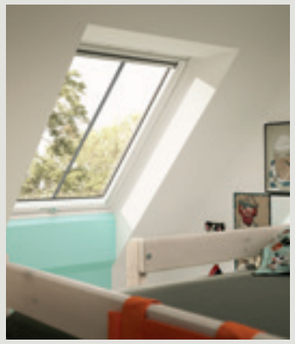
VELUX conservation roof windows

For traditional buildings

When planning dictates that a window of traditional external appearance is required, conservation roof windows should be considered. All of our conservation roof windows have the same technical features of a VELUX roof window but in a traditional black conservation style.

- Available in either centre-pivot or top-hung.
- Black external profiles and glazing bar. In RAL colour 9005.
- Recessed installation for slate and tiled roofs.
- Top-hung roof windows listed below are suitable for emergency escape.
- Other sizes and glazing options available – contact us for further information.



What does a conservation package include?

- Roof window with pre-fitted glazing bar with laminated glazing as standard for safety.
- Recessed flashings available for a more streamlined external appearance.
- Insulation collar and underfelt collar provided for a weathertight and energy efficient installation.

Optional glazing bars for standard VELUX roof windows

Depending on where you live, conservation officers will have different requirements. The black finish featured in our conservation roof window packages may not be required in your area.

By adding a glazing bar to a standard VELUX roof window with a grey exterior, you can create a traditional appearance, allowing you to take advantage of all roof window styles and sizes available (except triple glazed roof windows).

Grey glazing bars are also available for standard VELUX roof windows

Recessed flashing

In addition to a glazing bar, you may be asked to install your roof window deeper into the roof than can be achieved with standard installation. To do this you should select a recessed flashing kit, streamlining the roof window so less protrudes above the roofline.

Recessed flashings are also available with insulation and underfelt collars and are recommended for optimum energy efficiency. Our full range of recessed flashings are available as part of our conservation roof window packages.

To create your grey conservation package

1. Select your preferred VELUX roof window. This includes white painted, white polyurethane, pine and all operating methods. **P20–27**
2. Choose a flashing kit right for your roof pitch and roofing material – we recommend a recessed flashing kit. **P58–59**
3. Use VELUX installation products for optimum energy efficiency. **P56–57**
4. Add one or more conservation glazing bars of the right size to your roof windows. Remember, to match grey exteriors you should consider adding a grey glazing bar (nearest RAL 7043).

	55 x 78	55 x 98	78 x 98	134 x 98	55 x 118	66 x 118	78 x 118	114 x 118	78 x 140	94 x 140	134 x 140	94 x 160

VELUX bundles – Completing your perfect project with ease

A hassle-free project comes down to choosing the right materials and fittings. So it's important to specify everything you need at the outset to get it right first time. To make your life easier, we've selected the optimal products for key projects, shown here as bundles, making it clear and simple when it comes to ordering everything you need.

velux.co.uk/bundles

Loft bundle – perfect for bedrooms

Light is a big consideration in bedrooms. On the one hand you want a bright and airy room, but most people like a darker room for a good night's sleep, so this bundle combines a blackout blind with your choice of roof window.

FLASHING – Marries the roof window to the roofing material. Available for either slate or tile roofs, for roof pitches between 15-90° for centre-pivot and 15-55° for top-hung roof windows.

+

INSTALLATION PRODUCTS – Ensures a well-insulated and weather-tight installation. The kit features an insulation collar, transverse drainage gutter and underfelt collar.

+

TOP-HUNG WHITE PAINTED ROOF WINDOW – Ideal for when the roof window is in reach, to make the most of your view and to create a feeling of extra space. Includes noise reduction glazing to reduce airborne and rain noise for a restful sleep. **TIP:** Install two or more for a lighter, brighter space.

or

CENTRE-PIVOT WHITE PAINTED ROOF WINDOW – Ideal for when the roof window is set higher in the roof pitch or above furniture. Includes noise reduction glazing to reduce airborne and rain noise for a restful sleep. **TIP:** Extra roof windows create an airy and brighter room.

+

BLACKOUT BLIND – Fabric offers complete blackout for darkness, ensuring a good night's sleep. Install your blind in minutes with our unique Pick&Click!™ system. Available in 2 colours.

Choose from: White Beige

or

DUO BLACKOUT BLIND – Our duo blind combines blackout and pleated blinds in one. Available in 2 colours. Install your blind in minutes with our unique Pick&Click!™ system.

Choose from: White Beige

VELUX sloping and fixed combinations

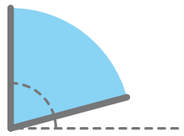
Give your home its own unique character

Featured: GGL PK08 2070 combined with GIL PK34 2070

Sloping and fixed combinations

Multiple VELUX roof windows create gorgeous, light-filled rooms. By combining VELUX roof windows, you can create panoramic views and bring in twice the daylight. If the pitch of your roof continues to the floor, you can extend your VELUX roof window by installing an additional window element, GIU (white polyurethane) or GIL (white painted) below. **These bottom elements have a fixed sash that cannot be opened.**

Roof pitch



15°-90°

Finding the right window

Follow the steps below to find the best solution for your room:

1. Decide on your combination.
2. Select your opening roof window(s) in sizes MK04, MK06, MK08, PK08 and PK10 **(priced separately).**

   Choose from:
   - Centre-pivot – p20
   - VELUX INTEGRA® – p24
   - Top-hung – p22.
3. Select your bottom fixed element(s) – sizes MK34 or PK34 (other sizes available).*
4. Select the appropriate flashing system for your roof window size and roofing material.

*** Other combinations can be created, contact us for further information.**

Sloped additional elements

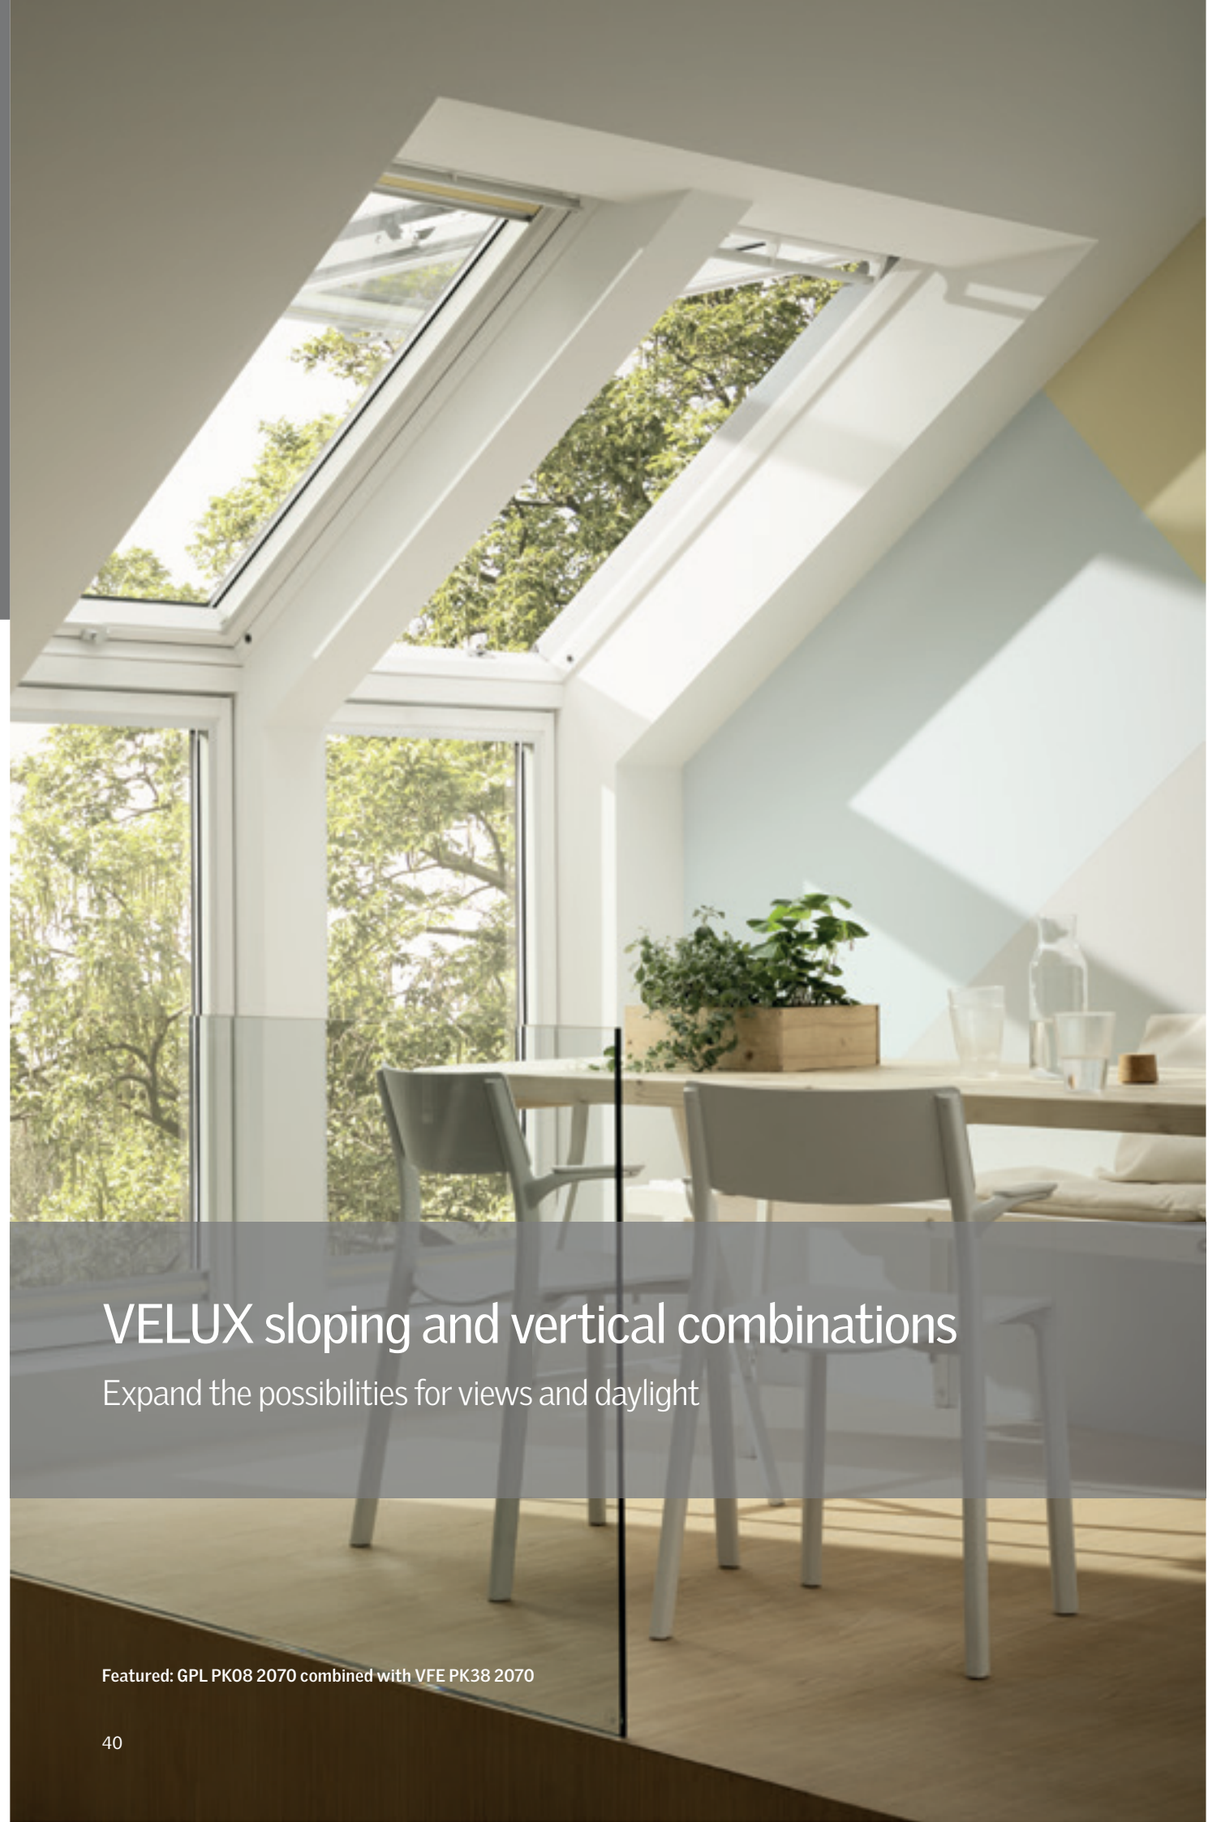
External frame size (nominal w x h) cm		78 x 92	94 x 92
Code	**Glazing**	**MK34**	**PK34**
White polyurethane – Fixed			
For a maintenance-free white polyurethane finish additional roof window elements GIU can be installed below VELUX roof windows GGU and GPU.			
GIU 0070 U-value 1.3 W/m²K	Laminated inner, toughened outer pane.	£441	£509
GIU 0060 U-value 1.3 W/m²K	Laminated inner, toughened outer pane. Easy-to-clean coating, enhanced noise reduction.	£526	£594
GIU 0066 U-value 1.0 W/m²K	Triple glazed. Laminated inner, toughened outer pane. Anti-dew* and easy-to-clean coating.	£606	£674
White painted – Fixed			
For a white painted combination additional roof window elements GIL can be installed below VELUX roof windows GGL and GPL.			
GIL 2070 U-value 1.3 W/m²K	Laminated inner, toughened outer pane.	£398	£459
GIL 2060 U-value 1.3 W/m²K	Laminated inner, toughened outer pane. Easy-to-clean coating, enhanced noise reduction.	£483	£544
GIL 2066 U-value 1.0 W/m²K	Triple glazed. Laminated inner, toughened outer pane. Anti-dew* and easy-to-clean coating.	£563	£624

*Anti-dew coating reduces number of hours external condensation is present.

Flashings – single

External frame size (nominal w x h) cm		78 x 190	78 x 210	78 x 232	94 x 232	94 x 252
		MK04 MK34	MK06 MK34	MK08 MK34	PK08 PK34	PK10 PK34
Code	**Description**	**MK04**	**MK06**	**MK08**	**PK08**	**PK10**
EDL S0121	Single installation for slate up to 8mm thick.	£103	£106	£110	£119	£121
EDW S0121	Single installation for tiles up to 120mm in profile.	£103	£106	£110	£119	£121

- All roof windows and flashings have a delivery time of 7 days.
- Delivery time is in working days from receipt of orders placed before 4pm (UK) and 11.30am (NI).



VELUX sloping and vertical combinations

Expand the possibilities for views and daylight

Featured: GPL PK08 2070 combined with VFE PK38 2070

Sloping and vertical combinations

NEW! Our VFA and VFB side-hung vertical elements for tilt-and-turn opening. Comes with opening restrictor for enhanced safety. **Arriving Spring 2019.**

Finding the right window

Follow the steps to find the best solution for your room:

1. Decide on your combination – single, twin or triple.

2. Select your white polyurethane or white painted roof windows in size MK04, MK06 or MK08 **(priced separately).**

   Choose from:

   - Centre-pivot – p20
   - VELUX INTEGRA® – p24
   - Top-hung – p22.

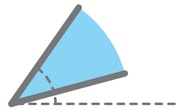
3. Select your bottom vertical element(s) – size MK31 or MK35 (other sizes available).* The white painted vertical element is available as either side-hung or bottom-hung, and opens inwards for added ventilation and cleaning. The white polyurethane element is fixed.

4. Select the appropriate flashing system for your roof window size, combination and roofing material.

   If selecting twin or triple combinations, we recommend the use of an EBY trimmer for added support and a harmonious internal finish.

*** Other combinations can be created, contact us for further information.**

Roof pitch



15°-55°

Combine sloping and vertical white polyurethane or white painted roof windows to expand your view and increase daylight. Ideal for one and a half-storey properties.

VELUX flat roof windows

Performance from every angle

Featured: CVP 100150 0673QV combined with an ISD 100150 1093

VELUX curved glass rooflight

The stylish solution

The VELUX curved glass rooflight is the ideal choice for homeowners with 0-15° roof pitches.

- Elegant solution for externally visible installations.
- Glass-to-edge construction allows for a clear, uninterrupted view.
- Low maintenance due to curved glass allowing rain to run off.
- 3-layer glass construction ensures optimal energy performance.
- Scratch-free glass prolongs the unit's expected lifetime.
- Hassle-free installation in 0-15° roof pitch.

Roof pitch

0°-15°

For pricing see p45

VELUX flat glass rooflight

VELUX flat glass rooflights are a stylish addition to our flat roof window range featuring an attractive eye-catching glass pane.

Convenience and high performance

As well as an innovative design, the flat glass rooflight features all of the outstanding specifications you'd expect from VELUX.

- It comprises a maintenance-free PVC framework and lacquered aluminium cladding.
- Highly energy efficient, our high-performance insulation is integrated into the frame to give the best possible protection against heat loss.

Fixed rooflight

The VELUX fixed flat glass rooflight can transform any space and is ideal where there is a need for bringing in daylight without ventilation. The double glazed unit has a laminated inner pane for additional safety.

Electrically operated rooflight

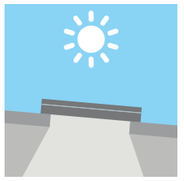
The VELUX vented flat glass rooflight provides ventilation and fresh air through the roof, and it can be operated automatically with the VELUX INTEGRA® wall switch.

Roof pitch

2°-15°

Special consideration for applications below roof pitch 5°:

If installed below 5°, there is an increased risk of water, dirt and debris standing on the glass, which in some cases, can cause slight discoloration of the glass over time. Installation of flat glass below 5° does not affect the lifetime and quality of the product compared to installation at 5°.



VELUX curved and flat glass rooflight

Options and pricing

Roof pitch

0°-15° For curved glass

2°-15° For flat glass

1. CHOOSE YOUR TOP COVER

CurveTech

CURVED GLASS (ISD 1093)

- Curved glazing and glass-to-edge design ensure uninterrupted drainage.
- Curved shape ensures a clearer view to the sky.
- Up to 6mm scratch-free glazing.
- Installation in 0-15° roof pitch.
- Recommended option for visible installations.

or

FLAT GLASS (ISD 2093)

- Flat glass design fits the roof line.
- 4mm scratch-free glazing.
- Installation in 2-15° roof pitch.

Why VELUX Modular Skylights?

VELUX Modular Skylights are specially designed to bring more natural light into modern, flat roof homes and extensions. Modularity allows you to design with daylight over larger roof expanses, with an end result that blends more with the surroundings.

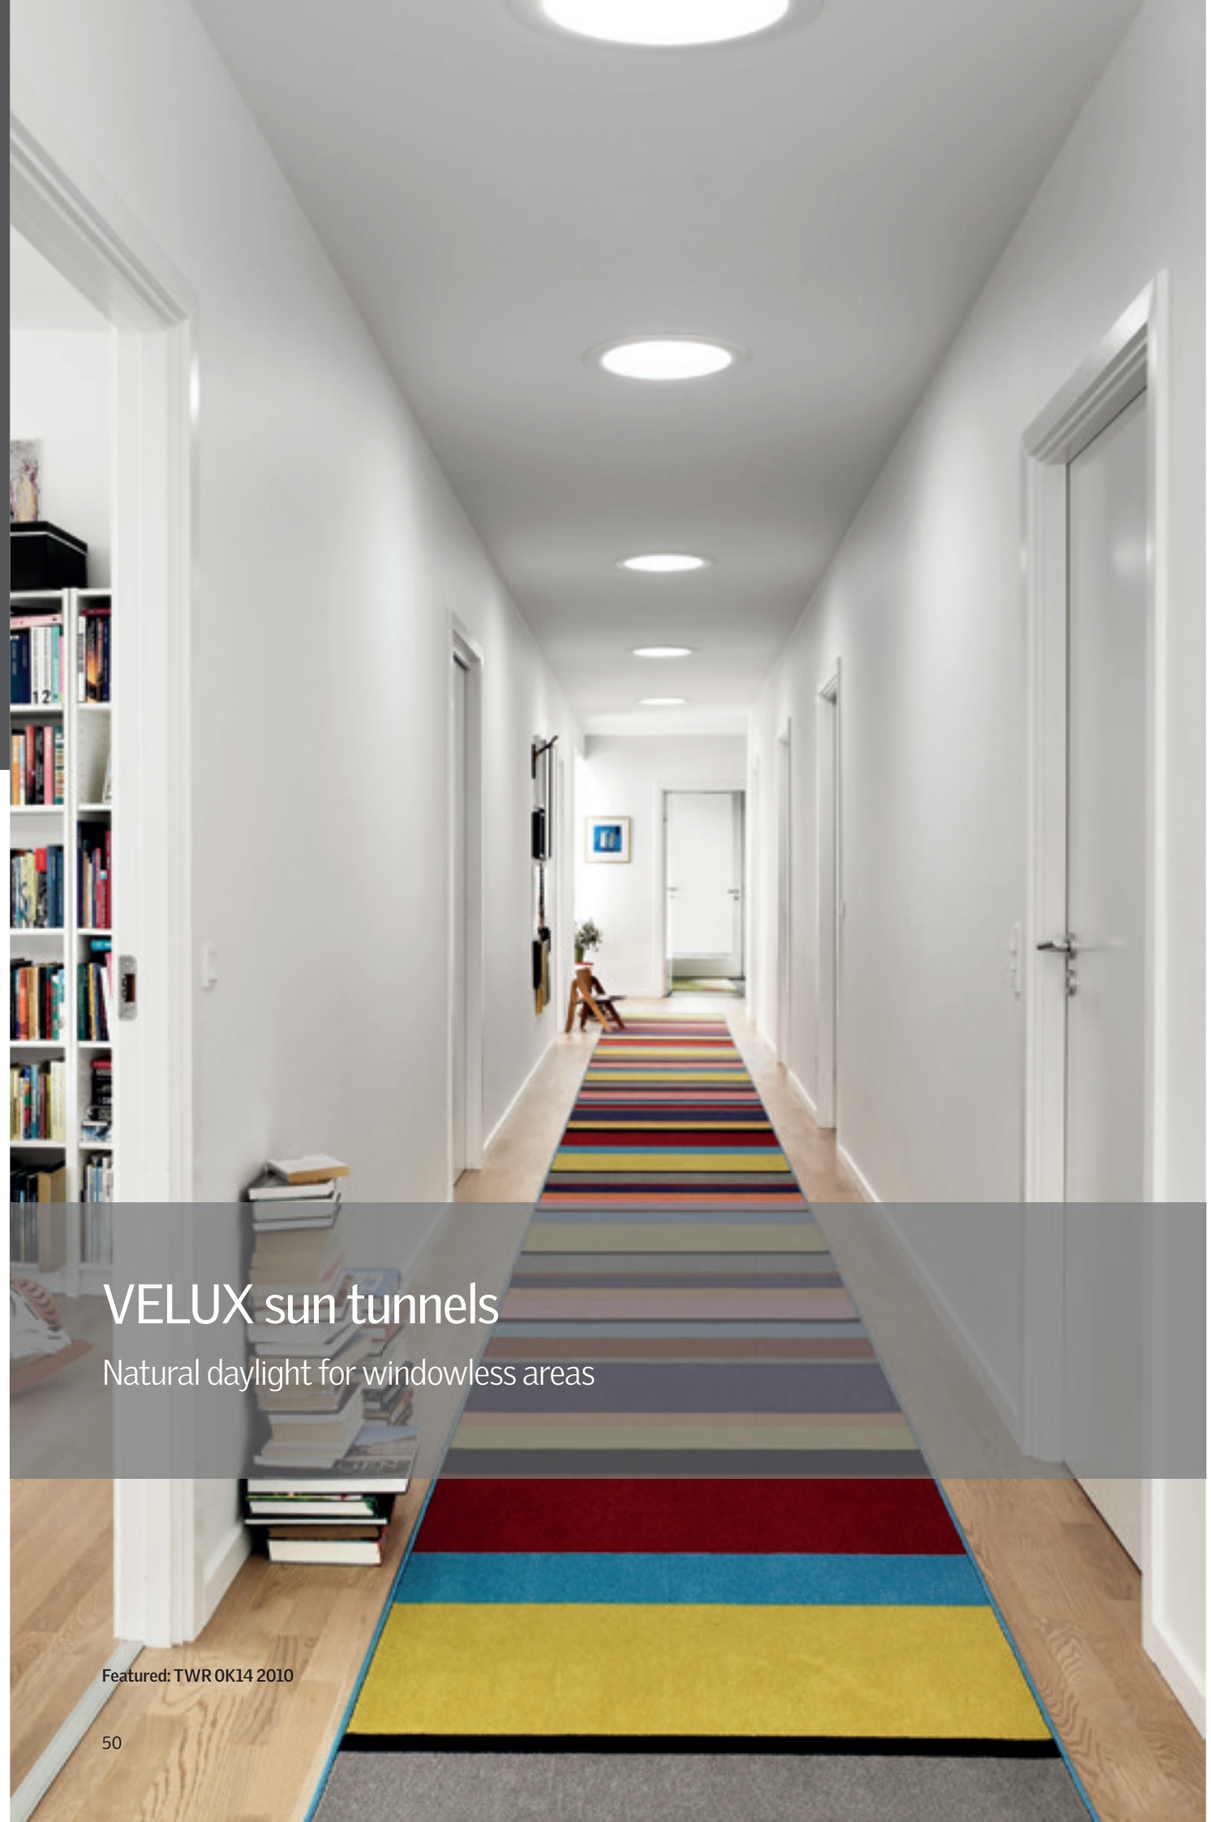
Unique design

VELUX Modular Skylights offer a slim profile design, which is great for modern homes that need to make the most of the daylight. Electrics and motors within vented modules are concealed, creating a simple and refined look, inside and out.

Light up the rooms in your home

The kitchen is the heart of the home, and the range of activities we enjoy there means that the lighting must meet everyone's needs, whilst also keeping the room looking good, morning, noon and night.

With VELUX Modular Skylights, the light enters directly from above, right into the centre of your room. This is a much stronger source of illumination than limited light coming from your vertical windows.



VELUX sun tunnels

Natural daylight for windowless areas

Featured: TWR 0K14 2010

VELUX sun tunnels

Natural daylight where you never thought it could be achieved.
Ideal for windowless bathrooms, hallways and cupboards.

Rigid sun tunnels for pitched roof

- Rigid tunnels are recommended for maximum daylight.
- Recommended tunnel length 0.9-6m.
- 1.7m tunnel supplied (ZTR extensions are available).
- Available in 10 and 14 inch.

Flexible sun tunnels for pitched roof

- Flexible sun tunnels should be used where a rigid tunnel is not suitable.
- Recommended tunnel length 1.5m.
- 2m tunnel supplied.

Flat roof sun tunnels

- Available in rigid and flexible.
- Supplied with PVC kerb and polycarbonate dome.
- Recommended tunnel length 0.2 – 0.9m.
- 0.9m tunnel supplied.

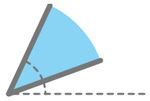
- All roof windows have a delivery time of 2 days.
- Delivery time is in working days from receipt of orders placed before 4pm (UK) and 11.30am (NI).

Rooflights for uninhabited spaces

Roof pitch



20°-65°

Rooflights

- Frame and integrated flashing made of maintenance-free polyurethane.
- Operated using a handle with three ventilation positions.
- Extruded aluminium sash which can be hinged on both sides, opening to an angle of 90°.
- Opening restrictor that engages at 90° only.
- Black internal and external finish.

Uninhabited spaces

Our rooflights are designed in such a way that you have the opportunity to bring light into uninhabited spaces. It is not advisable to use these rooflights in habitable rooms due to their thermal performance.

Replacing existing roof windows

It's time for a change. Let in more daylight, create more comfort and increase energy efficiency.

Featured: VELUX white painted top-hung roof window (GPL MK06 2070)

Think bigger

Replacing a roof window, or even making it slightly bigger can bring so much more light into your space.

We've provided the same range of roof window sizes for the last 40 years, so it's usually very easy to find a direct size match.

- Minimal disruption as roof windows are replaced in the existing aperture.
- Replacement installation can typically be finished in a day.
- Work can usually be carried out from the inside.

Always improving

We continuously work towards improving our products and energy efficiency.

- Improved thermal performance and sound reduction for greater comfort.
- Larger glazing areas allowing more daylight in.
- Upgrade to a white finish or VELUX INTEGRA® electric or solar remote operation.

Save time and money with VELUX replacement flashings

EL and EW single replacement flashings are essential for replacing older VELUX roof windows manufactured before April 2001 with a current roof window while maintaining the original installation level of the roof window.

This allows old roof windows to be replaced without disturbing the interior finish of the room, saving you a lot of work. If you were to use a standard flashing you would need to re-do the internal lining around the roof window.

Replacement roof window flashings

Upgrading existing roof windows

Improve the functionality of existing roof windows with automated solar operation.

Upgrade manual roof windows to VELUX INTEGRA® solar powered operation.

Opening operation

SOLAR POWERED

- All the same features as VELUX INTEGRA® (page 24) electric roof windows, but powered by the sun.
- PV solar cell on external window frame requires direct exposure to sunlight.
- No need to plug into a power supply, making installation even quicker, easier and no need for redecoration.

For a smarter, healthier home

Find out more on page 28 and watch the film at velux.co.uk/active

Code	Description	
KSX 100	Conversion kit to upgrade to full VELUX INTEGRA® solar powered functionality of GGU or GGL centre-pivot roof windows manufactured between April 1986 and January 2014 (includes rain sensor). Not compatible with M27, P25 and 425.	£235
KSX 100K	Conversion kit to upgrade to full VELUX INTEGRA® solar powered functionality of GGU or GGL centre-pivot roof windows manufactured after February 2014 (includes rain sensor). Not compatible with CK01, CK02, MK27, PK25 and SK01.	£235

- All conversion kits have a delivery time of 2 days.

Upgrading glazing

Advances in pane technology allow the upgrading of existing glazing units to provide better heat and sound insulation properties.

All panes are AA fire rated.

Turn your dream of a nice, peaceful sleep into a reality, reduce traffic noise in your home and increase energy efficiency, simply with an upgrade to your glazing.

For roof windows manufactured before April 2001 contact our customer support team at 01592 778 225 to enquire.

Installation products

Building regulations relating to insulation and air-tightness of roof window installations have become more stringent. We have not only developed a range of installation products to help make it quick and easy for you to be compliant, but the range also offers increased energy efficiency and a safe installation.

A

Vapour barrier – BBX

- Helps prevent condensation from forming in the roof construction.
- Complete vapour barrier collar, fully welded in all corners.
- A fully welded rubber gasket with a double pressure seal guarantees speedy installation and a vapour and air tight solution.
- Reinforced corners for extra security against perforation.
- VELUX installation tool helps fit the collar in a matter of minutes.

B

Insulation collar – BDX

- Insulates around the roof window frame, reducing heat loss and eliminating cold bridges.
- Makes insulating and installing the roof window a simple process.
- Supplied with BFX underfelt collar.
- Made to all standard roof window sizes.
- Click fittings ensure fast and accurate assembly.

C

Roof window

- The performance of your selected VELUX roof window is optimised by the use of installation products.
- All VELUX roof windows are compatible with VELUX installation products.
- Simply select your desired size, style and glazing option.

D

Underfelt collar – BFX

- Ensures a weather-tight seal between the roof window and the roof.
- Can also be purchased separately from the insulation collar (BDX).
- Pleated material ensures a flexible and tight seal to the underfelt of the roof, whatever its construction.
- Made from diffusion open material to minimise risk of condensation.
- Comes with transverse drainage gutter to lead water away from the head of the roof window if a tile or slate is broken above the window.
- Welded corners ensure a watertight and simple installation.

E

Flashing

- Marries the roof window to the roofing material and ensures a weather-tight seal.
- Standard VELUX flashings are compatible with VELUX installation products.

For use of installation products with recessed flashings, see packages on page 59.

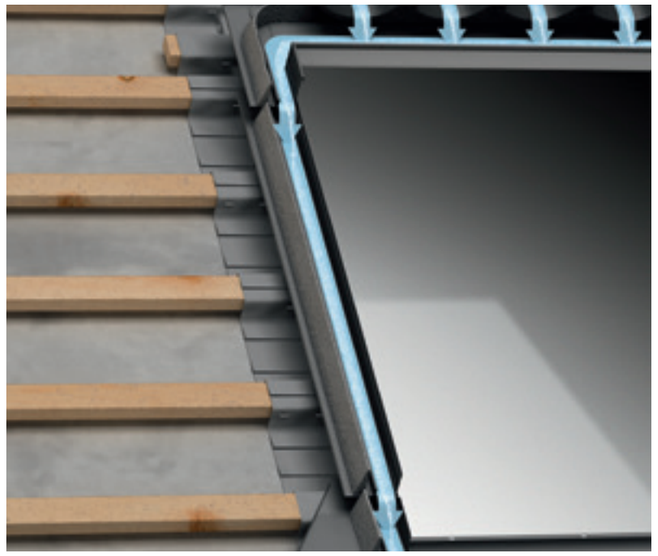
Flashings

We provide a range of flashing options to suit your roofing material.
The information below will help you to select the most appropriate flashings for your installation.



This image is for illustration purposes only. Colour not a true representation.

Opening sizes depend on the flashings used. Instructions available online

Compatibility

To find out more about the compatibility of roofing materials, flashings and different installations (such as thatch and interlocking slate tile), please go to **velux.co.uk/flashings**

EDN / EKN

- Recessed flashings for installing roof windows into slate up to 8mm thick.
- EDN 2000 Includes BDX 2000F insulation package as standard.
- Not for interlocking slate.

EDJ / EKJ

- Recessed flashings for installing roof windows into flat or profiled roofing material up to 90mm in profile.
- EDJ 2000 Includes BDX 2000F insulation package as standard.

EDN, EDJ, EDL and EDW 2000 variants come with installation products included

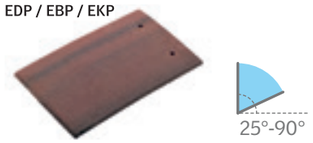
EDL / EBL / EKL

- Flashings for installing roof windows into slate up to 8mm thick.
- Not for interlocking slate. See EDW for details.

EDW / EBW / EKW

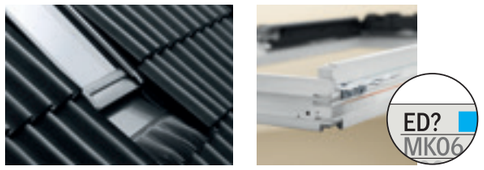
- Flashings for installing roof windows into flat or profiled roofing material up to 120mm in profile.
- Also for interlocking slate, thatch and profiled sheeting.
- Our EDW flashing suits virtually every installation and supersedes EDZ as our standard tile flashing.

EDP / EBP / EKP

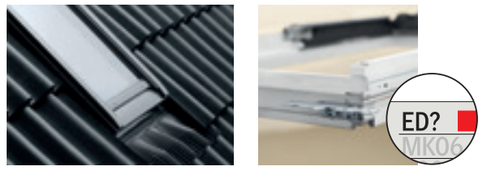


- Flashings for installing roof windows into plain tiles (max length 300mm).
- Maximum thickness of 14mm.

Recessed and standard flashings



Featured: EDJ recessed tile installation.



Featured: EDW standard tile installation.

Recessed flashings

Recessed flashings provide a sleek and streamlined finish as the roof window is installed deeper into the roof structure (see image above), meaning that less of the roof window protrudes above the roofline. We recommend BDX insulation collar and BFX underfelt collar, included in EDN and EDJ 2000, for optimum energy efficiency.

Recessed installation height – install the brackets at the sides of the roof window frame, at the blue line level.

Standard roof window flashings

We provide a range of flashing options to suit your roofing material. The table below will help you to select the most appropriate flashings.

Standard installation height – install the brackets at the top and the bottom of the window frame, at the red line level.

Recessed flashings

Blinds and shutters for any room

Control the amount of daylight and temperature within the room

Featured: DKL PK08 0705 combined with DKL PK04 0705

How to select your blinds

1 Select type

Choose an interior and/or exterior VELUX blind or shutter that meets your requirements in terms of heat protection, blackout, light adjustment or insect protection.

2 Select colour and design

Our blinds are available in an extensive range of exciting colours and designs.

3 Select operation method

Choose between manual or automatic operation. Always consider electrically-operated products for out-of-reach areas.

4 Select the right size

Check the data plate which displays the type and size of your roof window – you must match the blinds you order to this information. See the chart below for more details.

VELUX roof window data plates

5 Installed in minutes

VELUX interior blinds are easily installed with our unique Pick&Click!™ system. Follow the instructions, and your blinds will be fitted in minutes.

Pick&Click!®

New VELUX roof windows are fitted with pre-installed brackets to ease installation and to ensure a perfect fit every time.

All VELUX internal blinds are power operated or cordless operated and fulfil the safety in use requirements in EN 13120:2009+A1:2014 and EN 60335-2-97:2006+EN 60335-2-97:2006/A12:2015.

Sizing chart

It's simple to make sure you order the right size of blind:

- Check your roof window's data plate, then use the SIZE CODE to find its measurements on the chart below.
- Now you can check the price of your chosen blind on the following pages.
- Make sure you use the SIZE CODE on your roof window's data plate when ordering your blind at **veluxblindsdirect.co.uk**

Children's collection

Disney & VELUX Goodnight Collection

Make bedtime full of wonder

The Disney & VELUX Goodnight Collection is our latest range of blackout blinds designed for kids. Inspired by their favourite characters from Frozen, Cars and Winnie the Pooh, night time has never been so much fun.

Our themed blinds will spark their imagination while they play during the day and, because the fabric offers total blackout, they'll enjoy restful sleep too.

- 99.9% blackout fabric – the best on the market!
- Installs in minutes with the unique VELUX Pick&Click!™ system.
- OEKO-TEX® certified – no harmful substances.
- Slimline design integrates perfectly with VELUX roof windows.

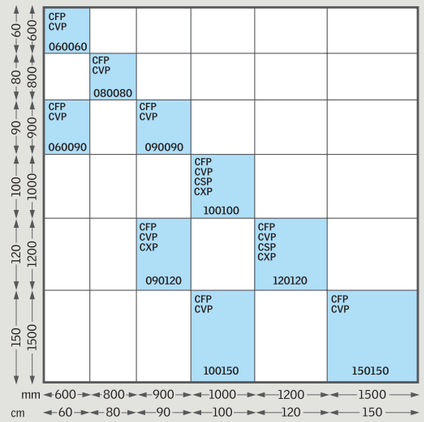
Flat roof windows



Note: All sizes for flat roof windows refer to structural opening sizes.

Using our size guide

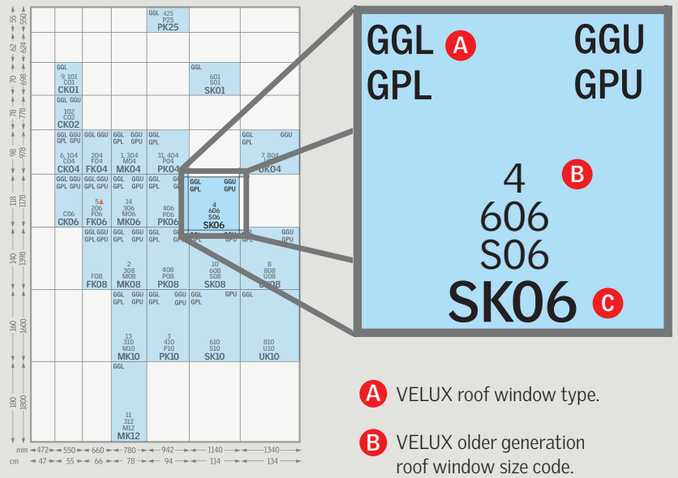
Please note all sizes refer to the external frame size of the roof window and not the glazed area. Please refer to installation instructions for trimmed opening sizes.

For product sizes and specifications not listed in this brochure, please visit **velux.co.uk** or contact us on **01592 778 225**.

Looking to replace your existing VELUX roof window? Use these handy size charts to locate your current window code and the replacement code.

For example, if your current window code is GGL4, the replacement size code for this is SK06.

All measurements are in mm and cm as indicated.



A VELUX roof window type.

B VELUX older generation roof window size code.

C VELUX current size code.
