LIGHTING ASSESSMENT
for
PROPOSED EXTERNAL SIGNAGE
for
SANTANDER

Site Location – 764 Wilmslow Road, Didsbury M20 2DR

The internally illuminated fascia sign is lit using low energy LED's to illuminate the flex face material, giving even illumination across the complete fascia, and any ambient light will be lost in the immediate vicinity.

The externally illuminated projecting sign is lit using low energy LED's. The sign has been designed so that the light is angled on to the face of the panel, and any ambient light will be lost in the immediate vicinity.

The signs will be on a time clock and photo cell, with the hours of illumination being from dusk to 11pm.

The existing internally illuminated ATM (Cash Machine) Header panel is lit using 2-off TL5 fluorescent lamps and electronic control gear to illuminate the face panel, any ambient light will be lost in the immediate vicinity. The header panel is continuously illuminated for the safety and security of persons using the cash machine.
