# G r o u n d  R e p o r t

This site has in the past had planning permission and the build was started under Manchester City council building regulations.

The footings were dug and passed by MCC building regulations,
concreted and brickwork up to chamber the internal was also filled to level with mot stone and compressed.
After this stage we were informed by highways that the site had a public right of way and all work was stopped.

We have now re-applied for a narrow building in order not to interfere with the right of way and we had the consent back in 2016(Ref:112543/F0/2016).
As the build is already taken to landfill as part of the first construction as passed by mcc building regulations in 2016, I think the ground report would now show the new infill, please advise further what else is required.
