

Proposed Ground Floor Plan

Proposed First Floor Plan

Security Measures

- Premises to be protected by anti-ram bollards (to LPS 1246 or BS PAS 68) or similar to deter against ram-raid type attacks.
- An intruder alarm to be installed with contacts on all external doors and with movement detectors in all ground floor rooms with windows. The alarm should be monitored by an appropriate body.
- Premises to be covered by a comprehensive CCTV system, ideally linked to a remote monitoring centre in order to ensure that there can be an immediate response to any incidents and should cover the following areas:
 - Rear Yard
 - Dispensary room
 - Storage room
- Intruder alarm to be installed with contacts on all doors and with movement detectors in both the dispensary and storage rooms. The alarm should be monitored by an appropriate body.
- Personal attack alarms to be provided within the pharmacy unit, once pressed the alarm must activate a loud alarm at the scene. The inclusion of personal attack alarms will allow members of staff the ability to raise an alarm should an incident occur whilst they are within the unit.

General Notes:

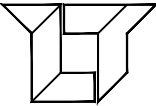

All site dimensions shall be verified by the Contractor on site prior to commencing any works.

Do not scale from this drawing.

Design intent drawing only. Construction to comply with latest building regulation requirements.
