Hi Sue,

This just in from the EA regarding our planning permission submission. Hopefully this will help with your decision process

Best regards

Ian

Subject: RE: Lab manufacture

Hi Ian

We have discussed the proposals regarding the expansion of the lab facilities for manufacture of small quantities of pharmaceutical intermediates and cosmetic ingredients. Our view, based on the information you have supplied, is that this currently falls outside permit regulation as the quantities produced fall well within the scope of the RGN2 guidance for producing in a chemical plant.

However, we also need to consider the overall impact on the environment from these activities (e.g. waste production, emissions) and that you have the capacity to produce material in significantly greater quantities than currently anticipated. For this reason, we would advise you install a suitable monitoring port in the stack that can be accessed, to future proof the activity should production increase and/or legislation/BREF changes impact on the activity.

We will need to keep the quantities produced under review. We can decide how this can best be achieved at our next meeting.

Are you able to confirm the date in August for our next meeting yet?

If you wish to discuss this further, please contact me.

Kind regards

Gill

Subject: Lab manufacture

Hi Ian

I know you've been busy doing the IED tables, but I wondered if you have had a chance to look at the information I sent you regarding the lab manufacture? If you let me know some more detail, we can give you our thoughts on whether this should be included in the permit.

Kind regards

Gill
