David

I refer to your application for Secured by Design (SBD) accreditation for the proposed care home development at the above site, in particular the matters highlighted on your drawings issued on 6th February 2019. In general the proposals appear acceptable in relation to security and if the development is constructed in accordance with the supplied documents, it should achieve the Secured by Design (Bronze) award – the bronze award is applicable to developments where a significant proportion of the construction requires use of non-standard or bespoke items, for example the conversion / refurbishment of old buildings. Evidence of compliance with the SBD checklist dated 4th April 2018 will be required prior to granting the award – this should comprise provision of certification for the door-sets & windows, specification information relating to non-standard doors and windows, together with a site inspection (carried out close to the time of completion), in order to ascertain that the construction is in accordance with the supplied plans. Subject to satisfactory implementation / verification of these matters, an SBD certificate can then be issued.

Kind regards

Michael Craig
