

Electric Roller Shutter Technical Specification's

As per your requirements please find the specifications and layout for the proposed development on your site.

- ❖ Entire open space will be covered with electric roller shutters.
- ❖ Roller Shutters will have galvanised solid laths 20 SWg.
- ❖ Roller Shutters will be operating on electric Tubular Motor (REVERSE SHUTTER)
- ❖ Roller Shutters will have Manual rolling handle it helps rolling the shutter manually in case of electric failure.
- ❖ Roller Shutters will have infrared Safety beam sensors to prevent the shutter from rolling automatically in case of any object comes under the safety beam area.
- ❖ Roller Shutters will have T-Rail Installed at the Bottom it enhances the shutter strength.
- ❖ Flag Plates will be covered with U Shaped Canopy.
- ❖ We will use 4"x2" Angles to make flags.
- ❖ We will use 4"x2" Guides for the curtain track being extra wide they help to run shutter smoothly and for extra safety.
- ❖ As per new legislation requiring all shutters to comply with the Construction Products Directive(C.P.D) all doors are designed,manufactured and indepently tested to meet the requirement of BS EN 13241:2003.
- ❖ If you need any further information please do not hesitate to contact us.
