This Message originated outside your organization.

Steve,

Further to our earlier telephone conversation, see attached our SWMP that we use on our projects, we estimate the following:

Based on 40-yard skips:

Waste – 4 skips

Wood – 2 skips

Scrap – 3 skips

Based on 8-wheeler wagon:

Hardcore removal from site 15 - 20 wagons

Note: We will **not** be crushing on site, the company removing the hardcore to their premises in Manchester will do return loads with 6f2 for infilling and tracking in the site.

As all the skips/wagons are arriving/leaving site, banksmen will be in positions to allow safe access and egress into the working/hoarded area.

Steve, I believe you have done a plan for Jane showing the location of the skips and cabins etc.

Regards

Chris Giblin
