

Existing facade

Signage Proposals.

External Signage

Proposals have been put forward for external signage to the entrance of the unit. The proposals aim to tie in with the existing Victorian inspired lanterns on the adjacent Mr. Thomas' Chop House and also further down St. Anne's Alley. A more modern internally illuminated projecting box sign will be provided with signage affixed to the front of the glazed/perspex panels a powder coated steel frame will provide the structure.

The proposals also include the introduction of a signage plaque next to the door this will be lit from above by a bulkhead style caged downlight.

We are also proposing to replace the doors, as can be seen in the existing image on page 02 the doors are currently in a poor state. We aim to provide new dark grey powder coated metal doors with small 'porthole' visibility panels within each leaf.

Notes: Photo-style images are illustrative only. Drawings should be referred to for correct dimensions and locations of signs.

Door and lighting addressed in change of use and external alterations application ref. 131749/FO/2021 and listed building consent application ref. 131750/LO/2021.

Projecting 'lantern' sign with dark grey metal trim, internally illuminated with vinyl signage to the outer.

Dark grey metal plaque / menu board with internally illuminated graphics.

Glazed 'porthole' windows to each door leaf made from toughened laminated glass.

New metal entrance doors powder coated dark grey (RAL 7021)
