Approval was then requested from Highways and Development, in addition at the time, all comments and objections were also provided. A delegated powers report was received by Private Sector Housing following approval from the Head of Engineering Services. This report required comments on Engineering Services and consultation with ward members, the Chief Constable, Chief Fire Officer, NHS and all relevant Utility Companies and Civic Societies. Any objections raised and lodged were assessed by the Director of Housing Services in conjunction with the Lead Member before the report was signed.

3. Evaluation of Site Assessment and Consultation.

From the site assessment and consultation it can be seen that there is a problem with anti-social behaviour in the area. This anti-social behaviour has been reduced by the introduction of an alley gating scheme. It is thought that this scheme will be made more effective by increasing the affective height of the wall next to 2 Wilpshire Ave to 2.4m.

4. Outline of Design.

It is intended to place metal railings on top of the wall at the side of 2 Wilpshire Ave to effectively increase it's height to 2.4m.

5. Outline of Access.

All components are designed to be as accessible to people with disabilities as practicable.
