Dear Madam

Highway Enquiries – Proposed 02 Street Works Site on the pavement of Lightbowne Road, Manchester M40 5HQ.

I refer to your letter dated 18 March 2008 requesting information relating the above site and would comment as follows: -

My records indicate that the footway of Lightbowne Road on your plan is adopted.

However, this letter is confirmation only of the status of your site. If it is your intention to site your apparatus at this location it will be necessary for you to submit a formal written application, to the above address, containing a detailed plan showing the exact position of your proposed apparatus, together with dimensions and measurements.

These details are requested in order that an assessment can be made on how the siting of the apparatus will affect the public highway.

Furthermore, any confirmation of the status of a site does not confer any agreement with regard to the proposed site. I would recommend that you contact the Chief Executive's Regeneration (Planning Control Section), general telephone number 0161-234 4516 and the Chief Executive's Engineering Services Section, (Traffic Development Control), Salisbury House, telephone number 0161-455 2275 to discuss this matter further.

Manchester City Council is the appropriate authority for the serving of Notices. These should be forwarded in the usual manner via the ETON system, or alternatively, the Notices can be sent in paper format via the post or facsimile (facsimile number 0161 908 5776), or to the Street Works Section, for the attention of Veronica Wong, to the above address.

Nevertheless, I would inform you that if the Notices were sent in paper format they would be subject to the Street Works Register (Registration Fees) Regulations that came into force on the 1 June 1999. Furthermore, these notices should not be sent until the departments listed above have been consulted and a written response from the respective departments has been received.

My records indicate that Lightbowne Road is designated as 'traffic sensitive' at this location.

I am not in a position to comment on other utility apparatus located in the highway and would recommend that you contact the Statutory Undertakers directly to obtain this information.

I trust this information is of assistance and return your plan for future use.

Yours faithfully

Pat Parker
Systems Officer
