COUNCIL INFORMATION PANEL C.I.P.

The unit has two sides, one for use by the local authority and the other for advertising. Several uses can be made of the side for the local authority.

Maps:
General maps and maps of specific areas are prepared in close collaboration with the local authority Engineering Department and printed by our Map Department.

Municipal information:
The poster in the unit shows the main local authority projects (zoning plan, urban development, roads, etc.), can be used to promote public facilities (swimming pools, nurseries, libraries, etc.), or informs the public about local activities by publicizing cultural events, sports centres, schools, parks, etc.

General Information:
This takes the form of information on aspects of city life such as safety, keeping the city tidy, promotion of public transport, environmental protection, etc.

Information on city activities:
The display gives information on minor cultural and sporting events, etc., and is important to tourism.
These displays can be designed and produced by our City Information Department.

DIMENSIONS

Height	2458 mm
Width	1272 mm
