
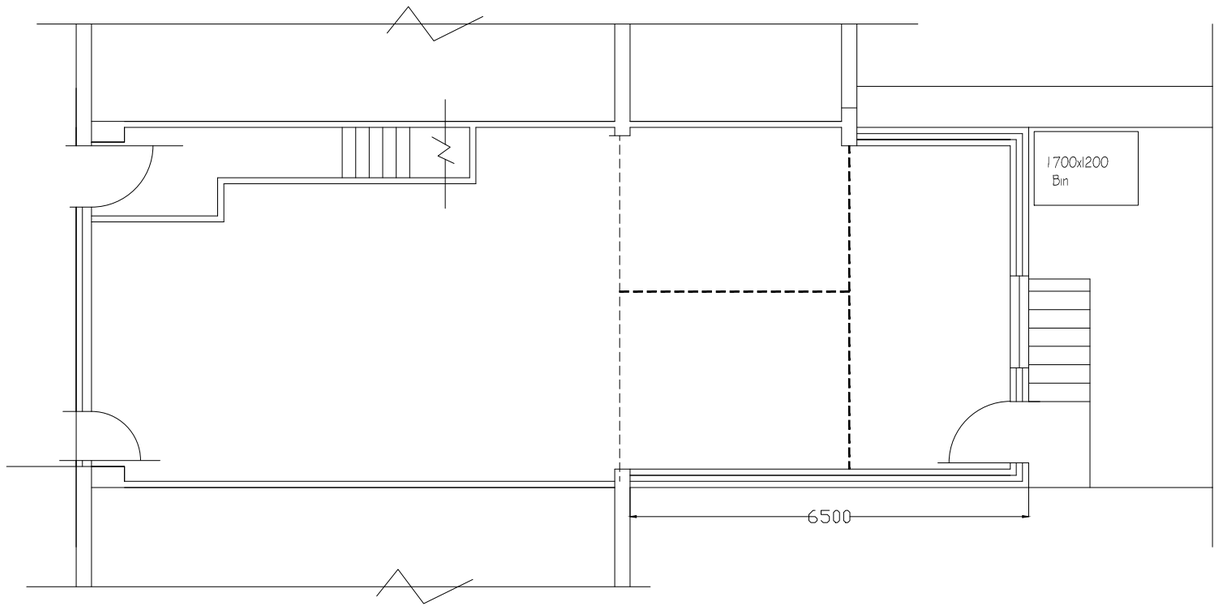
Rear Elevation



Proposed Ground Floor Plan

The builder must check the site and the approved drawings before commencing the works and must take any working measurements as neccessary.Any discrepancy in the drawing must be reported to the client .

The client should arrange for a detailed site investigation prior to the commencement of any works or preparatory works, to establish the condition of the subsoil, and the location of any drains, sewers or other services within or adjacent to the site. Work must not be commenced prior to the granting of planning permission, and or Building Regulations approval.

Boundary positions must be verified by the client prior to construction. If in doubt this must be checked with an accurate deed plan, for further verification consult the clients solicitor for clarification.
