Frontage and Shutter Details **Ref - SFDby** **Page 1 of 2**

750 Wilmslow Road, Didsbury, Manchester

The existing Upvc frontage coloured white has a central single entrance door with a clear opening of 770mm. The existing entrance is flush at the threshold to the existing pavement

The unit is presently part of a two unit premises trading as JP& Brimelow

The proposed frontage would be of a modern appearance finished in the company corporate colours in a powder coated finish of Light Ivory Ral 1015 and Pantone 355 Green, incorporated would be a concealed night shutter.
The side piers will conceal the guides of the night security shutter and the sign will conceal the shutter coil.

To reduce the impact of the night security shutter it is always company policy to conceal the shutter and guides. The shutter lathe will be perforated to reduce visual impact and finished in light ivory Ral 1015 to blend in with the shop-frontage colours.

The proposal for the new shop-frontage would move the entrance to the right hand side and increase the clear opening access to 1550mm.

Repositioning the entrance would allow for better access, the threshold will be flush to afford full access under the disabled regulations.

An example of a shop-frontage with the corporate scheme and a concealed night shutter is shown as is the existing frontage.
