A&B

Manchester Grammar School
Bus Park

Sustainability Statement
08018.3A

The proposed bus park is sited on an existing tarmac overspill car park in the SE corner of the Manchester Grammar School site.

No trees are being felled and the existing laurel hedge between the school and adjoining housing is being retained at its original width between kerb and neighbour's back gardens.

Existing gullies and manholes are being retained by the new scheme which (apart from areas of kerbing and paving to allow for safe pedestrian access/egress between the buses and school), does not alter the extent of tarmac.

Thus there is no significant alteration to surface drainage.
