

examples of our own Levenshulme mural paintings

Manchester Library of Things

We envisage a container that enhances the community feel and the aesthetic of Levenshulme Old Library, with work by local artists brightening up the surface of the container, and community growing projects to create handmade planters (already in progress), growing beautiful and edible plants that enhance the community garden being planned by LOL CIO and a bee-friendly garden on top of the container.

Mockups below show potential ideas, and additional mockup documents depict the view of the container from the street.

Levenshulme Market container, brightening up the area
