Here are the acoustic test results for Whitworth Street West(taken opposite Gorilla on the residential side of the road).

Results show a dB of 73.1 and then 70.4 - taken 11am and 10pm respectively.

Conversational noise level is around 60dB.

Just for comparison we tested inside Gorilla at 10pm too, and got a reading of about 75dB, so that's a busy bar with dj's and all access points closed peaking at only 2dB higher than the street outside!
