Jackie,
Further to the letter I have received, dated 11th April, please see requested information below;
Waste management Strategy;

1 Number of bins proposed-
No bins / skips in proposed compound. Compound for storage only. The packaging from the kitchen units etc. are removed within the dwellings. This packaging is then disposed of in skips (placed on the road, removed at the end of the day).

2. Bin storage are -
No bin storage relating to planning application.

3. Bin collection arrangements -
No bins relating to planning application.

Further to the reference of "rubbish dumped within compound area" shown in submitted photographs, I have visited the area, there are items within the compound from previous use of the compound and litter. These items will be removed and put into the above mentioned skips.

If you require any further information, please phone or email. I have moved offices, and letters sent to the old address take a couple of weeks to find their way here. New address below.

Best regards,

Richard.
