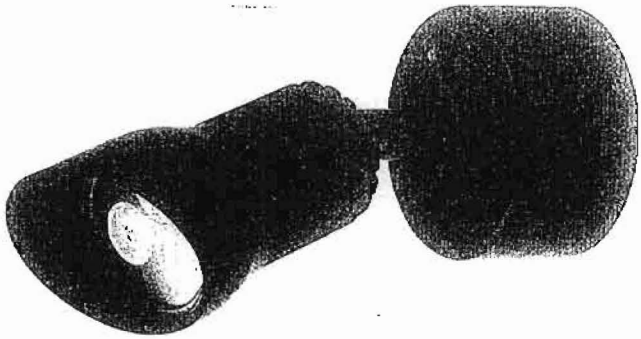
## WL140F Straight to Mains LED wall light



Flick the switch and expect to be amazed. This good looking wall light may be elegant and understated, but it's light output is greater than a 35w dichroic. The new LED technology contained inside produces more than twice the light output of its competent predecessor, 706 Lux at 1m. Straight to Mains simplicity make this an easy replacement for those ugly power hungry wall lights of old.
