
Waste Management Strategy

Currently a wheelie bin for the shop premises is stored along with that of the upstairs flat in the shared yard to the side of 38 Old Moat Lane which is where the access to the flat (38A Old Moat Lane) is located. This arrangement is shown on the enclosed floorplan.

If this application is successful it is proposed to continue storing the wheelie bin in this location. In addition a second sealed bin will be provided for meat waste products that will be subject to different weekly collection by specialist renderers.

Collapsed cardboard boxes will also be stored in this location for weekly collection.

Bins are collected from the front of the property also indicated on the floorplan a distance of 5m from the storage facility.

In addition a public litter bin is already provided to the front of the premises for customer and public use.
