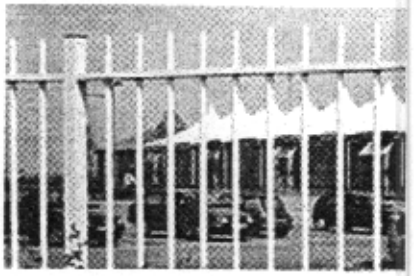
Barbican Imperial

- Classic looks with a softer appearance

For those who prefer the classic look with a softer touch, Imperial gives you all the advantages of the Barbican range, but with 25mm and 32mm diameter round instead of square pales. With no reduction in strength or security, Barbican Imperial offers a style suitable for a variety of high prestige sites.



Finishing touches...

We now offer a final touch of elegance for both Barbican and Barbican Imperial - a choice of decorative finials and post tops, finished to match your fences and gates.

Also available with pales with a smaller gap between them, especially required for shcools and play areas. More information on request.

Panels can also be stepped or raked to allow for sloping ground conditions.

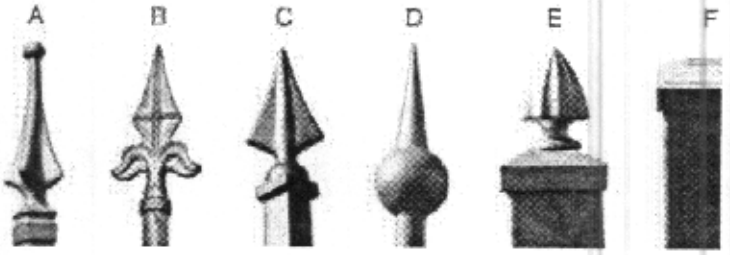
attached to the post for even more security.

Posts



The main posts are 60 x 60mm or 80 x 60mm depending on the fence height. Post centres are at 3M for fences up to 2.5M high and at 2.4M for fences 2.9M and 3.0M high. All are supplied with a post cap. Each concrete for stability. The post is designed to go into concrete approximately 700/800m on site are accommodated by stepping the sections. The maximum step per panel with 100mm. If the step is greater than 100mm longer posts should be used. In the case of specially constructed raked sections can be supplied.

Even more security with Security Extras

Alternatives to the standard spike security top are available to meet your specific requi include post extensions designed to support Jacksons Security Extras like barbed wire Spike, Barbican Extra and Alarm-aFence.
