

Eva Street Proposal – Approved by lead member

We propose to close the alleyway that runs along the top of Eva street from Grandale Street to Claremont road to improve the awful environmental issues that residents face here.

Phase one is to erect a fence at the location marked blue on the map (funding secured). Residents can then use this to create a 'green wall'. Funding must be spent by 31 March 2022.

Phase two of the proposal (funding secured) is to gate the alleyway at the two locations marked in purple on the map.

Phase three will be to put a gate in the location marked orange on the map (funding not yet secured).

There is already a gate in the location marked green on the map.

This will enable us to 'separate' the business alleyway from the residents. Currently the alleyway is strewn with waste including animal carcasses/oil and litter and is a real health hazard. Residents complain that businesses don't behave well and businesses complain that residents come from all over to dump waste that they then have to clear or are blamed for.

Problems have been ongoing here for 7+ years and we have finally managed to secure some funding to try to improve the situation here for residents.
