62 KINGSTON ROAD, DIDSBURY, MANCHESTER

Design Statement for proposed alterations to porch

The proposed alterations to the existing porch entail the replacement of supporting gallows brackets with supporting square timber posts on low brick walls surmounted by stone cappings. The traditional style will be completed by infill timber trellis panels.

The low walls will be constructed of hand-made brick to match the existing porch , whilst the stone cappings will match the stone sills of the existing window openings. The area between the walls will be finished by natural stone flags in a matching colour to the cappings on the walls.

Submitted in conjunction with the Householder Application for Planning Permission dated 23/10/2009
