

Dear Sir/Madam,

I hope the information provided in relation to the bin store is sufficient to satisfy your needs.
If you do require any further information or alterations to what I have proposed then please let me know.

I apologise if the images are not labelled under the correct option, being a discharge of conditions relating to a bin store it didn't seem worthy of most of the options.

I would also like to clarify, the size of the individual wooden slats in the images of the 3D model aren't to scale with the exact dimension of the timber boards that will be used in construction (as listed in full description of material). But they are a good likeness of the aesthetic that will be produced, the real thing will simply have less vertical grooves.

Thank you for your efforts in keeping Manchester a great place to live.

Warm Regards,
Josh Sant
