

Waste Management

The hotel's existing waste management is in place and our general waste will be collected by the hotel and transported to their current bin stores on Beaver St. The hotel have responsibility for collecting the general waste and recycling in their workflow.

As a B Corp registered business we will be minimising waste to landfill, recycling where possible utilising the hotel's existing waste management plan.

Offensive waste produced will be collected by Direct365 and stored in their supplied, locked & wheeled bins in a locked side room in the premises (outlined in blue on diagram below) until pick up which is described on the Waste Management Proforma (see accompanying form submitted as part of this application)

No additional waste management strategy is needed to safely operate the business in the premises.
