

REFUSE STATEMENT

Summary

It is proposed that there is no change to the existing bin stores located in the service yard at the heart of the campus containing 14 No 1100 litre bins and 5 No 240 litre bins. Waste collection will be implemented with collection vehicles accessing the site through the main vehicular access point off Greenwood Road and turning within the service yard.

The management strategy will continue to operate as it does presently during construction and following completion of the project.

Facilities for general waste

Number of bins: 12 bins - 1100 litres each
