

ILLUSTRATIVE DIAGRAM FOR PLANT MIX PLANTING PATTERNS

Perennial Mixes to be planted in groups of 3 - 6
Groups to be planted in blocks containing one of each group.
Blocks to be repeated throughout the planting bed, as closely as possible, to create repetition.
e.g plant mixes made up of plant percentages 40%, 20%, 20% and 20% to be planted in groups of 6, 3, 3, 3.

Bulb Mixes to be planted in groups of 5 - 9
Groups to be planted in blocks containing one of each group.
Blocks to be repeated throughout the planting bed, as closely as possible, to create repetition.

NOTES ON PLANTING

1 Topsoil: Topsoil shall be spread to min 450mm depth over planting beds and 150mm depth over turf areas and graded to fall. Topsoil should be in accordance with BS3882:2015 and where subsoil is required, to be in line with BS8601:2013.

2 Herbicide and Cultivation: Topsoil to be treated with an application of herbicide prior to planting, where necessary, strictly in accordance with the Control of Pesticides Regulations1986 (or otherwise updated/ superceded legislation), and following manufacturer's instructions by qualified staff. The topsoil shall then be cultivated to 150mm depth.

3 Container Grown Shrubs: Shrubs and transplants shall comply with the National Plant Specification. Shrubs shall be planted in pits 300 x 300 x 200mm depth, and the backfill shall include 3 litres Peat Free Tree and Shrub Compost. Specimen plants to be planted in a pit 400 x 400 x250mm depth with 5 litres Tree and Shrub Compost. BR whips should be notch planted as required and healed into position. Climbers to be installed with climbing supports, e.g ties and canes, as required

4 Herbicide: Spot treat with herbicide throughout the maintenance period in accordance with the manufacturer's instructions.

5 Bark Mulch: All Ornamental Planting beds to receive 75mm depth pulverised ornamental bark mulch.

6 Position of Plants: Final position of trees and shrubs subject to confirmation of service location and approval of statutory undertakers.

7 SEMI-MATURE/ MULTI-STEM IN SOFT LANDSCAPE: Tree pit 1000x1000x900mm depth with 150mm depth of clean stone to the base, 300mm depth good quality topsoil to BS3882-2015 and subsoil to BS8601:2013. If planted within lawn tree to be set in circle area of bark mulch 75mm depth at 500mm diameter. Stakes to be 3m 100mm diameter with cross bar, treated softwood driven firmly into the ground. Double stakes to be 1000mm above ground and fixed to tree with suitable rubber tree ties (with the tree in the middle). Trees to be planted with an irrigation pipe (to wrap around the rootball of the tree) and secure the end of the pipe to the tree stake. To be installed initially with water tree bags. Due to windy nature of the site trees also to be below ground guyed.

SEMI- MATURE IN HARD PAVING: Tree set in recessed tree grill, with paving inserts to match wider paving. Root Rain Hydro grille irrigation inlet. Trees to be secured with underground guying system

and below ground structural cell system (Root space or similar approved). Root deflectors required to prevent pavement lift and root barriers required is services in close proximity. Growing medium within the below ground cell system is to be the Arborcraft Soil. Integrated lighting point set within the grill. Loose gravel infill around the collar of the tree.

8 Watering: Plant only into moist soil and water thoroughly to the full depth of soil immediately after planting. Water regularly through the establishment period (minimum 3 months) to prevent dehydration. The trees should be watered through the irrigation pipe to ensure that the water gets down to the rootball. These trees should be watered regularly throughout spring-summer during the first 2 years to ensure that the tree root system establish well.

9 Turf: Complete ground preparations before turf is delivered to site to avoid turf drying out. Turf should be laid immediately on delivery. Remove all existing vegetation from area to be turfed and spread 150mm depth of top soil. Dig over or rotavate soil before laying turf if soil is compacted. Rake, lightly compact, and water soil. Stagger the joins when laying the turf. Water turf after laying and every day for the next 2-3 days, especially in periods of low rainfall.

10 Bulb Planting: Plant spring flowering bulbs(e.g. daffodils, tulips, spring flowering crocus) in autumn and autumn flowering (e.g. autumn crocus, cyclamen) bulbs in late summer. Plant bulbs at 8 per m2 in planting beds and 25 per m2 in lawn. Plant bulbs at a depth 2-3 times their height with the shoot facing upwards. Refill the holes and lightly compact soil to avoid damaging bulbs.

11 Soil compaction is likely to have occurred during construction on site. A site inspection should be carried out by a landscape professional to assess the level of soil compaction, including drainage testing to see if the ground is likely to become waterlogged. If the ground is deemed to be too compacted for plant growth and to drain adequately then remediation works should be carried out. This could include rotavation of the soil using a push along rotavator and/or ground being broken up with spades or small machinery. A second site inspection should then take place to ensure that the soil is fit for purpose.

12 Tree species selected subject to soil conditions and NHBC guidance. Root barriers may be required subject to findings from soil analysis and engineer's details.

13 Landscape architect to visit nursery to approve tree stock and pictorial imagery provided of quality and size of stock

14 All rootball sizes to be confirmed by supplier/landscape contractor to ensure earth mounding heights are adequate

Plant Schedule (Individual)										
Climber										
Nr	Code	Plant Name	Height/Spread/Grade	Girth	Age	Root	Container	Habit	Form	Density/m2
34	CW	Clematis uraphylla 'Winter Beauty'	80-100cm			C	5-7.5L			
3	Hyd ap	Hydrangea anomala peltiolata	60-80cm			C	5-7.5L	Several shoots		
14	Lon	Lonicera japonica 'Halliana'	100-125cm		1/1	C	5L	Several shoots		
Hedge										
Nr	Code	Plant Name	Height/Spread/Grade	Girth	Age	Root	Container	Habit	Form	Density/m2
98	Tb	Taxus Baccata	100cm			C		Width 40cm	1m Instant Hedge	1.00 /1/m
57	Tb [200cm]	Taxus Baccata [200cm]	200cm			C		Width 60cm	1.5m Instant Hedge	0.67 /1/m
Herbaceous										
Nr	Code	Plant Name	Height/Spread/Grade	Girth	Age	Root	Container	Habit	Form	Density/m2
163	Ag	Allium giganteum							Bulb	7.00
21	AHM	Anemone hybrida 'Max Vogel'	40-60cm			C	5L			
14	AHW	Anemone hybrida 'Whitewind'	40-60cm			C	5L			5.00
20	Aj tp A	Ajuga reptans 'Atropurpurea'	20-40cm			C	5L			5.00
92	Ar	Ajuga reptans	20-40cm			C	5L			5.00
