1.0 Introduction

1.1 Document Purpose

This document is a page by page comparison of the approved Section 73 drawings alongside the amended which forms part of the proposed Section 96a Application.

The changes to the drawings have been clouded in red to draw attention to the differences and are summarised below.

- + The corners to the office building have been pulled out and pushed in to deliver a consistent glass corner across the building. This repositions area around the building to return the corners to the same originally consented detail.
- + The colonnade has had the number of columns within each structural bay reduced, this is intended to improve visibility into the lower ground retail units and create a direct relationship with the public realm.
- + At the Level 10 roof terrace, the F&B unit has had the walls pushed to the extents of the above plant deck to develop an improved configuration for the proposed tenant.
- + The basement has had plant and car parking repositioned to develop an improved efficient layout.

Those drawings that are not to be amended are not included within this document.
