Dear Sir/Madam,

Application under Section 96a of the Town & Country Planning Act 1990 (as amended) for a Non-Material change to a planning permission

Application No: 132804/NMC/2022

Description: Non material amendment application to amend condition 8 (Contaminated Land) to allow for an amended UXO threat and risk methodology to be adopted 125573/FO/2019.

Location: Plot 11 , First Street South

I refer to your application for a non-material amendment to planning permission reference 125573/FO/2019.

Reason 1: Following an assessment of the details and plans submitted, it is confirmed that the proposed amendments are considered to be of a non-material nature and acceptable to the City Council as Local Planning Authority. The City Council is satisfied that the proposed changes will have no material impact upon the previously approved scheme and the works will not adversely affect visual or residential amenity within the area or will they have any significant material impact upon the overall quality of the development.

Reason 2: The re-wording of condition 8 is acceptable as several years have passed since the original condition was drafted and discharged during which internal research and writing procedures and processes have been improved and adapted to account for new information such that based on evidence on reactive UXO RMM needs to be applied and not the proactive UXO RMM.

Therefore I can confirm that the proposed amendments are hereby **approved**.

It should be noted that this letter of consent does not supersede the decision notice attached to planning permission 125573/FO/2019. These documents should be read in conjunction with one another. Therefore, the conditions previously applied to approval 125573/FO/2019 still apply to this development. However, due to the acceptance of the amendments outlined above, the following amended conditions also now apply:

8) a) The development shall be carried out in accordance with the previously agreed Remediation Strategy and a Completion/Verification Report (application ref no 111170):

Plot 8 - First Street, Detailed Remediation and Verification Strategy, For: Ask Real Estate Ltd

Job No: 1011906, Doc Ref: 1011906.RPT.GL.006, Latest Revision: A Date: 09/08/2016 and Plot 8 First Street, Manchester, Supplementary Ground Investigation Report, For: Southside Regeneration Ltd., Job No: 1011906, Doc Ref: 1011906.RPT.GL.007, Latest Revision: - Date: 12/10/2016 as amended by the Project: Plot 11 First Street South, Manchester document by Alpha Associates stamped as received on 28 01 22

(b) In the event that ground contamination, groundwater contamination and/or ground gas, not previously identified, are found to be present on the site at any time before the development in each phase is occupied, then development shall cease and/or the development shall not be occupied until, a report outlining what measures, if any, are required to remediate the land (the Revised Remediation Strategy) is submitted to and approved in writing by the City Council as local planning authority and the development shall be carried out in accordance with the Revised Remediation Strategy, which shall take precedence over any Remediation Strategy or earlier Revised Remediation Strategy

For the avoidance of doubt an imported soils need to be validated in accordance with MCC criteria, 1 per 200m³ for Greenfield and 1 per 50m³ for brownfield, minimum of 3 samples per source.

(c) After completion of site works, and prior to occupation a verification report to validate that the work undertaken conforms to the remediation proposals previously approved as outlined in (a) above and that imported soils are validated in accordance with MCC criteria (1 per 200m³ for Greenfield and 1 per 50m³ for brownfield, minimum of 3 samples per source) shall be submitted and approved in writing by the City Council as Local Planning Authority.

Should you wish to discuss the matter further, please contact Angela Leckie using the details above.

Yours faithfully,

Julie Roscoe
Director of Planning, Building Control & Licensing
