

the proposed development, having looked at the plans we would have the following recommendations:

and constructed to Secured by Design standards including laminated glazing; security-certified windows and doors (please see www.designforsecurity.org/secured-by-design/ or www.securedbydesign.com) to be resistant to crime.

Publicly accessible land In particular the rear boundary should be between 1800mm & 2100mm.

to the rear of the property and should be set forward as close to the building line as possible

external doors and to the side elevation so that the area for parking within the boundary is also covered.

Barriers formed by a combination of walls/railings should have railing panels that are fixed flush with the outer skin of the brickwork below, leaving no steps/gaps that would provide a climbing aid.

In relation to this matter, please do not hesitate to contact me.
