

## **Standard Terms Applicable to Chiller Package Quotations**

1. Prices quoted include kerbside delivery and site installation during normal hours, on the UK mainland within England and Wales.
2. Offshore sites, or those in Scotland, will incur additional carriage and installation charges, which should be clarified with us at the time of tendering.
3. Continuity of work, unhindered access, and normal site attendances are assumed. Any variation from these conditions may incur additional costs.
4. Offloading, cranning/lifting (if required), and site handling to final position are excluded in all cases.
5. Protection of the host chiller, acoustic package, and any surrounding equipment/structure is excluded.
6. A suitable true and level base is required to support free-standing packages. If this is not provided by others, additional costs will be incurred.
7. Most packages can be installed from our own scaffold towers if site conditions permit, otherwise a safe and level working platform must be provided by others around the perimeter of the chiller. Any safety scaffolding/edge protection that is required must be provided by others.
8. The pregalvanised/powder coated package construction is suitable for prolonged external use provided the prescribed maintenance regime is followed; however, particularly adverse environmental conditions (coastal etc) may necessitate alternative materials and finishes, at extra cost.
9. All prices quoted are valid for 30 days from date of issue (unless otherwise agreed), are exclusive of VAT, and are generally subject to our standard terms of sale, a copy of which is available on request.
