Important: Due to the current COVID-19 pandemic, there is a national shortage of ironmongery. Due to this issue we have taken the difficult decision to half the number of door bolts on every product, as a temporary measure to ensure we do not run out. Instead of providing two for each door (top and bottom), we will now provide one which can be fitted in the middle of the door to hold it shut - this still works perfectly well. Additional bolts will be sent out as soon as stock arrives.

Hide your unsightly wheelie bins with this attractive timber wheelie bin store!

Our quad chest wheelie bin store allows storage of four wheelie bins and is available in a range of sizes to fit 140, 180, 240 or 360 litre wheelie bins.

Possible wheelie bin size combinations:

- x4 140, 180, 240 or 360 litre bins (all bins the same size)
- 240/240/240/180 litre bins
- 240/240/180/180 litre bins
- 240/240/140/140 litre bins
- 240/140/140/140 litre bins

Each wheelie bin store is made using premium quality pressure treated redwood timber with high quality metal handles, hinges and a tower bolt to lock the bin securely away. These bin stores are built to last, with FSC sourced tanalised redwood planed timber being used.

The lid of the bin store features a chain which hooks under the lid of the bin and this allows easy access to the wheelie bin as you lift the bin store lid. This is ideal for when you are lifting heavy bags of rubbish up and in to your wheelie bin.

The store is free standing but can be bolted to the ground if required.

An optional hasp and staple can be added to your bin store to allow you to padlock your store.

We advise that even though the store is pressure treated, it would be beneficial to apply stain based treatment every 1-2 years to extend the life span of the store.

This product arrives flat packed with a full set of assembly instructions, fixtures and fittings.
