KEY

Proposed Stud Walls

Existing Brick Walls & Chimneys to be retained
(high historical significance)

GENERAL NOTES & METHOD STATEMENT:

- Proposed drainage runs are to be checked on site to ensure required falls can be achieved. Exact drainage design to be confirmed and agreed prior to commencement of work. Existing electrics to be adapted to suit the proposed layout. Exact layout to be confirmed by M&E Engineer.
- Survey to be undertaken on chimneys and services within. Access panels serving redundant services to be infilled with brick to match surrounding brickwork. Access panels serving current services to be retained, refurbished and repainted.
- Existing carpet tiles and vinyl flooring as well as all associated trims and transition strips to be removed, taking care to not damage floorboards beneath. All service hatches to be filled and made level with existing floor. Floor to be cleaned thoroughly prior to installing new floor finishes and existing timber floor made good. Carpet to be laid with underlay in classrooms and new slip-resistant vinyl in lobby, kitchen and WCs.
