For the attention of whom it may concern

Dear Sirs,

Re: Brunswick Street, Manchester - Japanese Knotweed

This letter is to confirm our previous and future involvement with the above scheme to any relevant parties.

I can confirm that JKSL have undertaken the following works on the above site:

- May 2019 – Site walkover survey
- 07.02.2020 – Site vegetation clearance works
- 06.03.2021 – Watching brief and installation of root barrier
- 12.03.2021 – Watching brief and removal of waste from site

I have enclosed drawing JK19-5063-01 which highlights the Japanese knotweed infestation recorded in May 2019 and the proposed vertical root barriers.

At present not due to return to site to undertake any further works.

We are able to offer a 10 year Insurance Backed Guarantee for the site if one is required for an additional fee.

In order to comply with current good practise guidelines we would recommend that we attend site after construction works have been completed to monitor until 2 growing seasons pass with no new re-growth recorded at an additional cost of [REDACTED] per visit.

Should you wish to discuss this site further please do not hesitate to contact me.

Yours sincerely

For Japanese Knotweed Solutions Ltd

[REDACTED]

Alexander Dayes
Managing Director
