About Us

James Robertshaw was founded in 1860 by our namesake Mr James Robertshaw of Collyhurst, Manchester.

Originally we manufactured Victorian box awnings with woodwork carved by hand, but were best known for the Spring Roller system, patented in 1908 and produced until 1954.

The business stayed within the Robertshaw family until the tragic death of James' grandson William Lancelot Robertshaw in 1960 and was then bought by production manager, Arthur Harrison, who relocated the company to Farnworth, Bolton.

Arthur owned and ran the business until ill health forced retirement in 1978. Arthur's son-in-law, Nigel Sharrock, who also worked within the business, assumed the role of Managing Director throughout Arthur's illness and subsequent passing in 1980 and remained the team's MD until 2017.

Today James Robertshaw is still a family owned business run by Nigel's wife, Lesley and son Matthew. In 2010 after 50 years at our Farnworth home, we re-located to our current, modern facility in Horwich, Bolton.

All products are designed, manufactured and exhibited within our production facility and on-site Customer Centre. With clients ranging from independent bars to national brands; architects, building contractors, residential clients and the blind trade; James Robertshaw has the creativity, expertise and knowledge to make a visible difference to any project.

The Retractable Roof Collection

Create an all year round, inviting and flexible space for your customers or house guests with the Retractable Roof Collection.

This collection boasts fully automated, versatile, modular all-weather systems bringing the comfort of indoors, outdoors. Make the most of your outdoor space throughout all seasons.

Homeowners can enjoy the ability to entertain year-round in a dynamic, adaptable extension of living space.

Restaurant and bar owners can benefit from an increase in profits with additional space for more covers, bringing a significant return on investment.

Trade Sub-Dealers

Our qualified trade sub-dealers have the skills to assist throughout the process of choosing the right shading solution for your home or your business.

James Robertshaw also offer the Servico Package, supporting our network of trade sub-dealers with full technical survey and installation, combined with a full five year guarantee. The package includes quick survey, manufacture and installation within 25-30 working days, as standard.

**We don't just find the solution.
We create it.**

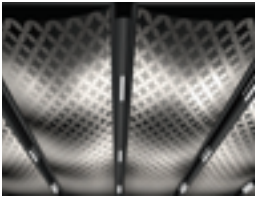

W-Series: Retractable Pergola Systems

- 3 Axis Lighting

► FABRIC & COLOURS

- Blackout Fabrics
- Translucent Fabrics
- Soft Furnishings
- Exclusive Fabric Collection

► GLASS SYSTEMS

- Folding Glass
- Sliding Glass
- Fixed & Adjustable Parapet System

Create an all year round, inviting and flexible space for all of your guests or customers to enjoy.

The W-Series is a fully automated, versatile, modular all-weather system which brings the comforts of indoors, outdoors. The result is year round use for your outdoor space.

Whether you're looking to extend your home or create more space in a restaurant or hospitality venue, we have a solution which will keep you entertaining guests no matter the weather.

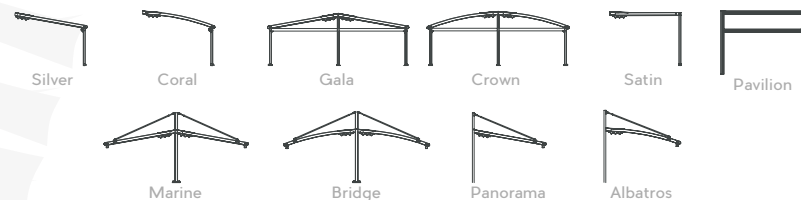

Expand the size of your business, increase covers and enjoy a significant return on your investment.

Each of our all-weather pergola systems is bespoke and made-to-order so that each installation fits perfectly into place, creating a sleek and fuss-free addition to your building.

With shapes varying from a curved roof to a flat or diagonal incline, free-standing or wall-mounted, it is up to you, with the help of our project management team, to decide which style best suits your taste and requirements.

Controlled by the touch of the button or through voice command, when the skies clear and the sun does shine, the W-Series opens out to let the natural light flow into your space.

Before you select your fabric, take your pick from our collection of stand shapes:

W-Series: Skyroof Systems

The ultimate adaptable shading solution for outdoor living.

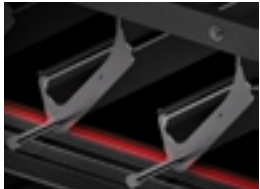

► THE DESIGN

The W-Series: Skyroof end-point-centred rotation technology provides integrity, stability and sealing within the high pressured power system.

► MULTI-SEALING

Powered by an electric motor & sealed with high quality gasket plugs, providing a completely airtight space for use in all weather conditions.

► THE LIGHTING

Linear or perimeter lighting can manage the amount of lighting you have once the sun sets.

The W-Series: Skyroof is a bioclimatic pergola system. The engineering of this product allows the user to rotate the panels in order to let in natural light when the sun shines. In contrast, the optional integrated lighting system can provide added light when the evenings get darker.

Your integrated lighting systems can be dimmed to create your perfect ambiance.

The W-Series: Skyroof incorporates revolutionary design which allows the panels to rotate to any angle up to 120° seamlessly.

An integrated panel gutter on each rotatable panel prevents objects dropping into the covered area upon rotation. Additionally, with an integrated gutter system, the closed W-Series: Skyroof can dispose of rainwater without disturbing guests or damaging furniture beneath.

Minimalistic yet multifunctional, the W-Series: Skyroof panels can also be insulated to provide greater comfort, stronger heat protection and minimise condensation on the unit.

The design of this product allows for a wide variety of modular construction opportunities due to its flexible and compact design. For full outdoor living, why not consider the complementary products, found on page 8, manufactured glass or strong awnings to protect the shelter from wind, rain and snow

Controlled by the touch of the button or through voice command, when the skies clear and the sun does shine, the W-Series opens out to let the natural light flow into your space.

Technical Specifications

STANDARD FRAME

MAXIMUM WIDTH (mm)	4500
MAXIMUM PROJECTION (mm)	7900

COMPACT FRAME

MAXIMUM WIDTH (mm)	3500
MAXIMUM PROJECTION (mm)	5123

Complementary Products

For weather protection and creating outdoor living areas used throughout all seasons, side elevations can be enclosed using a variety of options.

The choice of Glass systems, drop-arm awnings, external fabric-teeth roller blinds and external roller blinds with cable can all integrate and compliment the retractable roof systems, creating the W-Series.

Glass Systems - Folding & Sliding, Fixed & Retractable, Doors.

A105: Ocelot Drop-Arm Awning System

R101: Eliminate External Fabric Teeth Roller Blind

R105: Lynx-Cable External Roller Blind

Smart Home

Smart living starts with TaHoma®.

Somfy Smart Home puts you in control, making your life easier, more comfortable and gives peace of mind, wherever in the world you are.

Monitor and operate awnings, roller shutters, window decoration, lights, electrical equipment, heating, garage door and gate with your smartphone, tablet or voice.

You can adjust everything about the Somfy Smart Home System to accommodate your personal preferences – it can be monitored and operated from anywhere in the world.

Keep an eye on your home using cameras and movement detectors for home surveillance, for great peace of mind.

Somfy TaHoma is a smart box and the heart of your Smart Home. It links you to your home via the smart TaHoma app.

These solutions are extremely easy to use and can be installed with very little trouble. You can add products whenever it suits your needs or your budget. Get the most from your home with the least possible effort.

Meet The Team
