TOOTAL COURTYARD PAINT SAMPLE.

TMT attended site and took a small sample of the paintwork from one of the first-floor 1950's office windows. This sample was taken to a Dulux Trade branch for sample testing. The results were 70BG39024 Satin. The advised paint was installed to 2 areas, 1no. steel column and a section of the curtain walling at low level. Once painted a photograph has been taken with the new and existing shown together for clarity, which shows a clear match.
