Description

Please describe details of the proposed development or works including any change of use

The proposed works comprise the over-cladding of the site known as 'The Apple Building'.

At present the existing and original façade (cavity masonry infill panels) is experiencing water leaks throughout and resulting in mold growth within the units.

As such, we are proposing to over-clad the building with an anchored back mineral fiber insulation, which is then finished in an adhered brick slip system.

Details of the pre-application advice received

The extent of the correspondence has been around initial proposals which have informed our design and specification choice. The date referenced is the first contact with the planning officer of our initial proposals which have subsequently changed based on the information and requests from Jennifer - which are still continuing to this day.

Although no formal decision has been given from the planning officer in question, the proposed designs are from the information the current site is within a regeneration zone and that our initial proposal of a render finish would not be accepted. As such, the brick slip proposal is of a higher specification, a more aesthetically pleasing product and similar of that as to what has been applied to the new residential high rise dwellings to the West of Manchester city centre.

- (a) a member of staff**
- (b) an elected member**

It is an important principle of decision-making that the process is open and transparent.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.
