CRYLIC DOMES

Acrylic Domes

Acrylic domes are more popular than you may be lead to believe, and here at Talbot Designs, we have enhanced and upheld our reputation as the very best around in this field for many years now. We have consolidated our stance as innovators of the high quality, versatile **plastic dome** and show no signs of slowing down. This is to be expected from our team, as after all, the creation of unique and bespoke **Perspex domes** is a speciality of ours! We find that an **acrylic dome** from Talbot Designs is imitated, but never replicated, as we stand tall as one of the most reliable and trusted manufacturers around.

You're guaranteed to find the best quality dome when you begin working with our team of experts.

All of our Teedy™ **acrylic dome** solutions are covered by our unique certificate of quality, just in case you wanted added assurance that the standard of our products is the highest it could be. We understand that this is what you expect from us, and we're prepared to deliver. The acrylic display dome is becoming more and more versatile as the years go on, which in turn is making it a more popular option. Increasing numbers of people are starting to discover their multiple benefits, and we're happy to provide the sought after **Perspex domes** here at Talbot Designs. Not only can a **plastic display dome** be used creatively, but they are also crucial in the production of security cameras and equipment for safari parks and playgrounds.

Available in both an acrylic and polycarbonate material, our Teedy™ **Perspex dome** range is widely recognised as having the best shape and most consistent quality and clarity within the industry. We hold a huge range of

acrylic domes at our London base, stocked up to up to 1800mm in diameter. If you require an even larger dome for your order, please get in touch and we can provide made to order **Perspex domes**, tailored to your specific size.

It is the strength and durability of the **plastic dome** solutions we offer, they're suitable for use pretty much anywhere! No matter where you're considering implementing an **acrylic display dome**, Talbot Designs can design a product that will perform admirably in the circumstances. Many of our domes are designed for use externally, assuring that they can withstand the most challenging of conditions.

Available at a competitive price, it's easy to see why Talbot Designs are seen as the most value for money in the country when it comes to purchasing your ideal **plastic display dome**.

Acrylic Domes Delivery Service

Most of the **plastic dome** products that we offer as part of our service are delivered the very same day. We achieve this by using an overnight courier to help you receive your dome in perfect condition in double-quick time. Our service is second to none, as stated by our many happy customers, this is because we strive to ensure that you're satisfied after each and every delivery. Our stocks are larger than necessary to ensure that no matter how many domes you need for your project or intended use, we can deliver them to you in a timeframe you can be happy with. Who wouldn't want that? Our quick efficient service means you can soon benefit from your **display dome** **rylic** after your order is processed, giving you the freedom to show off yourressive structure to customers or passers-by.

Although we offer super quick turnaround times, we never compromise on quality. Talbot Designs customers are always given a product they're happy with, with its durability meaning it can be used for many years to come. This will explain why so many of them stay loyal to our service! Our **Perspex plastic** solutions are made with the best fabrication techniques and machinery, guaranteeing that they will be durable and last a lifetime. Even if they have to deal with the unpredictable UK weather on a regular basis, you will be safe in the knowledge that your product will hold up at all times.

Acrylic Domes in Various Industries

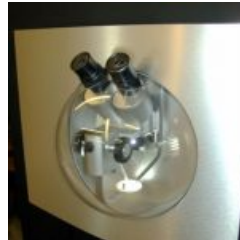

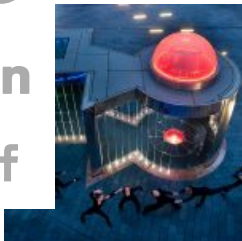

Our Teedy™ Perspex and polycarbonate domes have been used all over the world, even in the arctic circle! They are able to survive in such treacherous conditions due to their superior optical qualities. They are often used as a way of observing the beautiful night's sky in the areas, providing both a clear view and protection from the elements. These domes have also been used on many stages, TV and film sets over the years, as well as being used in industries centred around gaming, museums/galleries and general point of sale constructs. We have similarly supplied our Teedy™ range to a world where these **Perspex domes** can adorn shop windows and atria.

As you can see, a **plastic dome** is a versatile piece of equipment that can be used almost anywhere! If you feel like you could benefit, make sure you get in touch with one of the team today.

FAQS:

How big are Perspex domes?

We know that everyone's requirements are different here at Talbot Designs. It's this flexibility in our service that is one of the reasons why we have remained so popular. An **acrylic dome** that may be the perfect fit for one customer may be too big or too small for another, which is why we always work with an open mind and confidence in our abilities.

No matter what size **Perspex dome** you require, you can work with our expert team to create an end product that fits your requirements to a tee. The range of sizes that we manufacture for our domes is truly never ending, putting the power in your hands so you can be truly in control of the service you receive. Be sure to get in touch with Talbot Designs today to be put through to one of our specialists, so we can begin to work together as soon as possible.

Perspex domes made to last?

 quality of product here at Talbot Designs means that you needn't worry about the durability of your **plastic dome**. Not only do we endeavour to create the highest standards of domes around, but we also understand that some domes may have adverse weather conditions to deal with if located outdoors.

For example, if your **Perspex dome** is used as a security camera protector, it needs to be especially robust in its make up. This is to ensure that visibility is still clear at all times and to protect the camera from damage due to impact or poor weather conditions. The quality of plastics of used by Talbot Designs, as well as specialist fabrication processes, should give you complete confidence that we are the people to call.

What are Perspex domes used for?

One of the main reasons why **Perspex domes** are so popular is because their uses are truly never ending. Such is their strong and durable make up, more and more people are trusting them as a way of providing security or as an attractive display. After all, you're going to want to make sure you achieve maximum value for money, right? This is why customers communicate with us clearly to distinguish their intended use. This can be anything from using a large dome as a means of witnessing what's on the other side safely, or even as part of a stage show that is looking to catch the eye.

Regardless of your ideal use for an acrylic dome, you should definitely contact the team at Talbot Designs. We are able to work with you to create the ideal

solution to your exact needs.

What are the advantages of an acrylic dome?

The truth is, there are many advantages to owning a **plastic dome**. Should you want to protect items from the outside elements or general damage or present a cool and quirky way of showing them off to an audience, you can't go far wrong with an **acrylic dome**.

Their sheer versatility allows them to easily fit in a variety of settings, so they are assured to look the part wherever you want them to go. We're able to work closely with you so you can receive your ideal product. Our creative, experienced team can bring your ideas to life, meaning that wherever you want your dome to go, we can make it fit seamlessly with its surroundings.

 only this, but their durability makes them a value for money option that will for many years. No matter if your dome is required in an indoor or outdoor
 ng, these excellent products will beat any testing conditions and perform
ie highest standards.

What does a plastic dome look like?

Many people are of the opinion that plastic domes have one look that can't be altered in any way. Of course, the standard plastic dome will be in a dome-like shape, usually with a base underneath in order to protect what's inside.

However, a **Perspex dome** can look like whatever you want, especially with the help of the experts here at Talbot Designs. We have many years of experience in the industry and have taken a leading role in creating some of the most extravagant domes around.

Your dome can be in any colour, design, and size you require, helping you bring your dreams to life and allowing for some of the most creative and unique ideas we've ever seen! There is no challenge we can't take on, as we have full faith in our hard-working, imaginative team.

Come to us with your grand ideas, and we can help them become a reality.

How much do plastic domes cost?

Here at Talbot Designs, we're lucky enough to boast some of the most competitively priced **plastic domes** around. This is part of the reason why we

are so well respected nationwide and are the go to company for many when it comes to receiving a high quality product.

Depending on the size of the **acrylic display dome** you need, you will be charged accordingly. Our range consists of 27 standard sizes to choose from, which we're sure is more than enough choice to pick the most suitable for you. However, should you require a completely bespoke size, we're able to cater for this, just simply get in touch!
