OLYCARBONATE DOMES

Here at Talbot Designs, we stock a clean, sturdy, and versatile design of **polycarbonate domes** that can be used for a variety of different applications. Our domes are proudly on sale today, with them being available to purchase on site now! Such is our position as the plastic experts here at Talbot Design, we're sure you will find the perfect **polycarbonate dome** for you on your visit to our website!

The **polycarbonate dome manufacturers** that we stock are Teddy™, who is well known as one of the largest dome producers in Europe, being the first true brand of **polycarbonate manufacturers** in the continent. This brand is well known for its quality and accuracy, that is why we stock them! They are also covered by a Quality Guarantee so you have Talbot Designs' assurance that it will meet your requirements. If you're after the very best **polycarbonate dome** solution around (and let's be honest, why wouldn't you be) then look no further than us.

This guarantee is evidence of the brand's high standing within the industry, also ensuring that our range of Teedy™ **polycarbonate domes** will not let you down.

Polycarbonate is the material of choice for these domes, due to their incredible strength. It is chosen for its impact strength, which is its ability to withstand force and blows, as well as the high level of safety and security it provides. A **polycarbonate dome** is a safe investment, not only for your premises but also in terms of not having to be replaced for a very long time.

This material is commonly used in the manufacture of police riot shields, security windows and machine guards. Due to this substance's robust nature, it does go without saying that a **polycarbonate dome** will not let you down if you are looking for a strong and sturdy product that can take a lot of force without breaking.

Our **polycarbonate domes** have a UV layer that protects them from sun damage if they are used or displayed outside, giving you peace of mind that these domes really can be placed anywhere and withstand all conditions.

Whether this is for indoor or outdoor usage, you can rest assured that our high quality **polycarbonate domes** can be suitable for any function, anywhere!

Our experience in the supply of **polycarbonate domes** is second to none and shows no sign of slowing down. We have seen exhibitions and shop displays, as well as children's play area, benefit from their use thanks to their impressive level of impact strength as mentioned previously. To view examples of the work we have done for businesses all around the world, view our [past projects](#) on site. You will be able to see just how multi-functional the **polycarbonate dome** is, and how it could potentially fit into your vision.

We stock domes in a variety of sizes including:

- 200mm
- 300mm
- 400mm
- 500mm
- 600mm

FAQs:

What is a polycarbonate dome?

If you're looking for a strong and reliable way of introducing natural light to your building, then look no further than the **polycarbonate roof domes** from Talbot Designs. They are able to keep your interior protected from any adverse weather conditions or attempted break ins, due to their exceptional durability. Polycarbonate offers a strength that can't be matched by many other materials, so much so, we can confidently say it is virtually unbreakable!

This is why this material is also used on products that are designed to withstand major impact, including riot shields, ensuring that they are able to serve and protect with ease.

Such is the versatility of one of these domes, and the expertise on offer from Talbot Designs, we're able to offer a solution that can be used almost anywhere as a form of security. Simply get in touch with our team and we can discuss bespoke **polycarbonate domes** with you and how you could benefit from their use.

How strong is a polycarbonate dome?

One of the main reasons why **polycarbonate domes** are popular with customers here at Talbot Designs is due to their exceptional strength. After all, when in use, they are usually relied upon to keep a premises (or person!) safe at all times. When you have installed a **polycarbonate dome**, you can start to feel like you're in safe hands.

So, how do we know that polycarbonate is one of the strongest materials out there?

Well, if you think that glass is a secure material, have you learned a little more about polycarbonate? This material is regarded as “virtually unbreakable” as it has an impact strength of up to 250 times greater than glass! That’s right, gone are the days where glass is being used as a reliable material, say hello to the **polycarbonate dome**.

What is the purpose of polycarbonate domes?

There are many uses for **polycarbonate domes**, which explains why they are so popular with customers here at Talbot Designs. Their versatility is so great that they can become a security solution almost anywhere. This is down to their exceptional strength, allowing them to flourish in even the toughest of conditions.

For example, they can perform highly as a clear roof window or security window, providing a building with a source of natural light whilst also protecting from damage or break in at all times.

This level of protection is why they can also be used as room dividers, safety glass replacements or in building applications and agriculture.

What we’re trying to say is, **polycarbonate domes** offer exceptional adaptive qualities, so it’s likely that you’ll be able to benefit from their use.
