Product design & locations to be as follows ;

I would suggest this box for bats x 2 to be placed on the north-east corner of the building one facing north and one facing east.

*To be positioned at a height of 3-6 metres (the higher the better) in an open, sunny position (6-8 hours of direct sunlight, or in a location where it receives the morning sun if this is not possible).
and where it will not be disturbed by bright lights at night such as security lights.*

Beaumaris Woodstone Bat Box

Manufacturer: [CJ Wildlife](#)

- Suitable for external walls
- Single narrow cavity for crevice-dwelling species
- Available in two sizes

Condition 28) Full details of the design and locations of bat and bird boxes to be permanently installed in accordance with the agreed design.

Bird boxes x 2 should be placed on the north of the building and we suggest :

Vivara Pro WoodStone House Sparrow Nest Box

Manufacturer: [Vivara Pro](http://www.vivara.co.uk)

- One or two breeding chambers
- Durable and thermally stable
- Guaranteed for 10 years

Double Chamber

About this product

House sparrows (*Passer domesticus*) are sociable opportunists that survive in most UK habitats, from towns and cities to farmland and countryside. Substantial declines in both urban and rural populations (estimated 71% decrease between 1977 and 2008) have led to concerns for this species.

This House Sparrow Nest Box is manufactured from WoodStone - a mix of concrete and FSC wood fibres. This material is strong and highly insulating which helps to provide a thermally stable environment within the box. It also protects against damage from predators such as cats, woodpeckers and squirrels. It is available with one or two breeding chambers, which can be particularly suitable for house sparrows as they prefer to nest in colonies.

The House Sparrow Nest Box can be integrated into the masonry of a new house or fixed onto an external wall using strong screws and wall plugs (not included). If possible, it should be positioned near to vegetation and at a minimum of 2m above ground.

Double Chamber:

* Weight: 7.5kg

* Dimensions: Depth 16cm x Height 29cm x Width 21cm

* Number of chambers: 2

The Terrace's should be installed at least two to four metres off the ground making sure that there is a clear flight path to the nest. Boxes may also be sited directly under the eaves.

Boxes to be purchased from <https://www.nhbs.com/vivara-pro-woodstone-house-sparrow-nest-box> and <http://www.vivapro.co.uk/?search=Sparrow+terrace>

I hope this helps.

Any problems don't hesitate to contact me.

Kind Regards

Mandy
