

Galvanised Planters - Typical Specification

Materials	
Metal	0.8 Gauge Pre-Galvanised steel sheets (0.9 - 1mm thickness)
Fabriaction	
Seams	All seams are fabricated by way of a 'lockform' arrangement
Corners	All corners are fixed with rivets and a triangular corner plate.
Drainage & Liners	As standard our planters are made with drainage holes (10mm D) in the bases and are not water tight. Planters can be specified without drainage holes or PVC Liners
