F.A.O Angela Leckie

Dear Angela

New Century Hall, NOMA - Listed Building Consent Ref Ref. 130704/JO/2021

Variation of Condition Application - Tenant Fit Out

Please find enclosed an application under Section 19 of the Planning (Listed Buildings and Conservation Areas) Act 1990 (as amended) for a Variation of Condition Application to Listed Building Consent Ref Ref. 130704/JO/2021 which is pursuant to the original Listed Building Consent Ref Ref. 124349/LO/2019 dated 19th November 2019. This Permission relates to the Grade II Listed New Century Hall. The applicant is Four Plus One Ltd.

This application seeks amendments to wording of Condition 3 on the decision notice, alongside updated drawings to be added to the approved documents list (Condition 2). A concurrent Section 73 amendment application is also being submitted to amend the Planning Permission Ref. 130703/JO/2021 which sits alongside the listed building consent.

The amendments are summarised below and are detailed further in the following sections of this letter:

- Additional Back of House Room at Mezzanine Level – to divide one of the rooms to form two rooms, including installing a new door, and adjustments to the bathroom facilities.
- Dumbwaiter location – it is proposed to move the dumbwaiter slightly in order to better accommodate the final intend use and improve circulation space within the kitchen facilities.
- Public Address System Position – install fixings in lieu of the originally proposed steel supports to enable the lighting and the sound system to be installed within music venue. This will be essential in creating the optimum noise environment for students learning the craft of music production and sound engineering.

Deloitte LLP is a limited liability partnership registered in England and Wales with registered number OC303675 and its registered office at 1 New Street Square, London, EC4A 3HQ, United Kingdom.

Deloitte LLP is the United Kingdom affiliate of Deloitte NSE LLP, a member firm of Deloitte Touche Tohmatsu Limited, a UK private company limited by guarantee ("DTTL"). DTTL and each of its member firms are legally separate and independent entities. DTTL and Deloitte NSE LLP do not provide services to clients. Please see www.deloitte.com/about to learn more about our global network of member firms. Real Estate Services regulated by RICS.

- Plant routes and openings – moving the routes and therefore openings into the fabric further into the plant room for ventilation reasons, with associated changes in ventilation routes from the basement to ground floor.

Background and Planning History

New Century Hall is bounded by New Century House to the west, Miller Street to the north, Sadler's Yard to the south and Dantzic Street to the east. The site is located toward the western end of Miller Street which is a key arterial route to the city. The site benefits from close proximity to a range of amenities including Victoria Station and is on a prominent pedestrian route into the Northern Gateway, Northern Quarter and other parts of the city.

Planning Permission Ref. 124348/FO/2019 and LBC Ref. 124349/LO/2019 were granted 19th November 2019, which facilitated the refurbishment of the Grade II Listed building, including the change of use to allow the delivery of a mixed use scheme comprising of a food and drink offer; creative school; flexible events and conference facilities; and a music and performance space; together with new public realm and cycle parking forming a distinctly symbiotic offering currently unavailable in the city. For clarity in the context of this application:

- Basement will be in the teaching space for the College;
- Ground floor will be the food hall; and
- First floor will be the music venue.

In October 2021 a Section 73 and a Section 19 application were submitted to rationalise design changes arising from the construction period, as well as for the stabilisation works to the curtain walling. These were approved on 5 November 2021.

In December 2021, the building will be handed over by NOMA (GP) Ltd., to One Plus Four as future tenant of the space. A number of detailed design elements need to be resolved to prior to occupation of the building. Due to the minor nature of these changes, it is considered that the required amendments can be made to the extant consent through a further Section 73 application.

Description of Development

The Description of Development for Listed Building Consent as written on the original Decision Notice is as follows:

“Listed Building Consent for internal and external works associated with change of use from B1 (Offices), D1 (Non-Residential Institution) and D2 (Assembly and Leisure) use to mixed Sui Generis Use comprising A3 (restaurant and cafe), A4 (drinking establishment) (Ground floor), D1 non-residential (creative school) (basement) and D1 (flexible events and conference facilities) / D2 (music/performance space) (1st floor) and other ancillary uses and associated external alterations related to the reuse and refurbishment of the building including, creation of new openings to Sadler's Yard elevations; creation of new public realm

(including a pedestrian connection between Sadler's Yard and Miller Street) installation of external plant and construction of a concrete screen along Miller Street.”

This is to be read alongside the existing Section 19 (Ref. 130704/JO/2021) application description of development:

“S19 application to vary conditions 2 (Approved Dwgs (amendments to include stabilisation to curtain walling and changes to details of dance floor within Concert Hall)), 3 (Materials) and 4 (Details of Sprinkler System) attached to application ref no 124349/LO/2019”

Proposed Amendments

The tenant has undertaken a detailed technical review of the internal layout and uses of the building which have led to the proposed amendments. There are no changes to the shape or function of the building. The proposed variation of conditions will help ensure the long-term success of this historic building and will facilitate the Hall being suited to use by the creative school and as a high quality venue.

The amendments have been presented to the Local Planning Authority at an on-site meeting 10th August 2021 and it has been agreed that the principle of the amendments are broadly acceptable. Therefore, the amendments are submitted as a Variation of Condition Application to Listed Building Consent Ref. 130704/JO/2021.

The amendments proposed are to vary wording of Condition 2 (Approved Drawings), and Condition 3 (Materials). These cover the design developments detailed below.

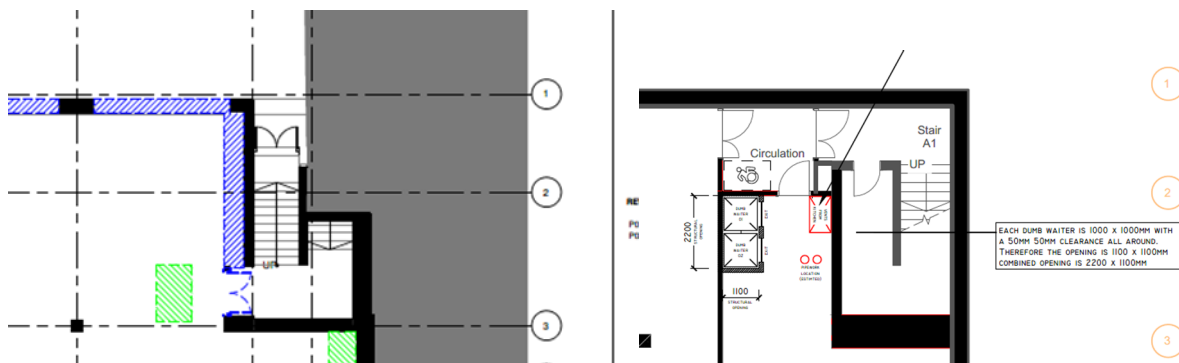

1.1 Additional Back of House Room at Mezzanine Level

As part of the technical review of the proposals, it has been identified that an additional dressing room at the mezzanine level will be required to facilitate and attract the target performers to the venue. This has been based on industry experience with these type of spaces, and the ambitions for the building to facilitate high-quality performances.

This will not impact the locations of the risers, with works comprising installation of a partition wall and a new opening for the doors, as shown on drawing W1707-203-Rev B.

1.2 Dumbwaiter Location

It is proposed to slightly move the dumbwaiter and associated slab demolition, the size of the slab demolition remains unchanged. This will see the location of the dumbwaiter move from gridline 3 to gridline 2 and which does not impact on any of the waffle slab within the basement ceiling. The change will provide an improved and more practical layout for the kitchen facilities.

(Left, showing original demolition of the slab on the ground floor GA; right, the proposed location of the dumbwaiter at basement level).

1.3 Ventilation openings

The tenant has undertaken a review of the air conditioning and ventilation requirements of the building. As such the location of the servicing penetration for the ventilation is now known. These are shown between basement and ground level within grid lines K and L, as shown on drawing 4021-F00-008, and have been positioned within the zones highlighted within the Tenant Fit Out Guide for allowable positions for service openings (Figure 2). The service opening is necessary for the provision of fresh air and extraction of stale air to facilitate the occupation of the basement area for College use.

Careful consideration has been given to location of the penetration through the floor slab so this will be aligned with one of the extract louvre grilles on the elevation to Miller Street, within the external plant compound area where permission has previously been granted as shown on drawing Nr NCHA-SRA-ZZ-XX-DR-A-20827.

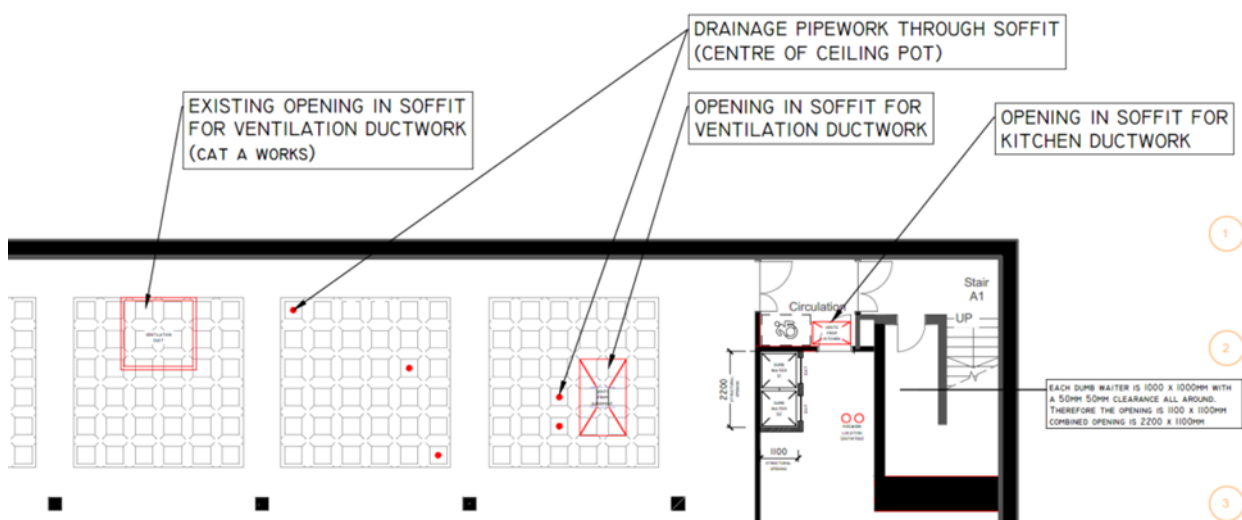

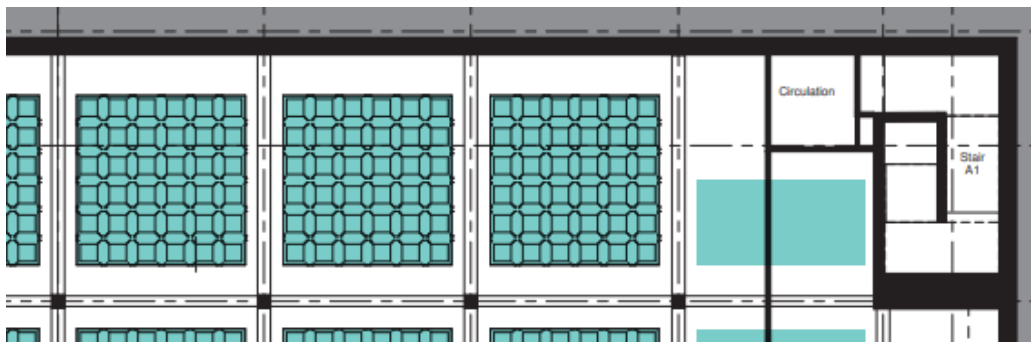

Figure 1: Ventilation openings – basement level (extract from drawing 4021-F00-008)

Basement Level 1 Floor Reflected Ceiling Plan

Service penetration zones for pop ups to serve Food Hall above
Maximum 45no. penetrations at any one time.

Figure 2: Tenant fit out guide - Ground Floor Food Hall Service Penetration Zones

An additional service opening is proposed within the floor slab to service the basement (College) kitchen extract, which is shown on drawing 4021-F00-008 (Figure 1) positioned adjacent to stairwell A1 within the circulation space. The opening through the slab is not positioned within the agreed tenant fit out zones (Figure 2) and therefore 4021-F00-008 drawing has been provided to reflect this proposed modification. This is necessary in order to align with the uses on the ground floor W1707-203-Rev B and will sit within the steel framework required for the dumbwaiter opening. By locating these adjacent to each other will result in one area of opening and associated steel work.

As shown on drawing QS4669/JH/M02 (Figure 3), a corresponding external extract louvre is proposed to the Miller Street elevation at ground floor level for the kitchen extract again between grid lines L and M. This louvre will be in lieu of the previously proposed small square section extract louvre shown on drawing NCHA-SRA-ZZ-XX-DR-A-20827 between grid lines J and H. The louvre will be positioned so this is screened from road level by the perimeter wall to the plant compound.

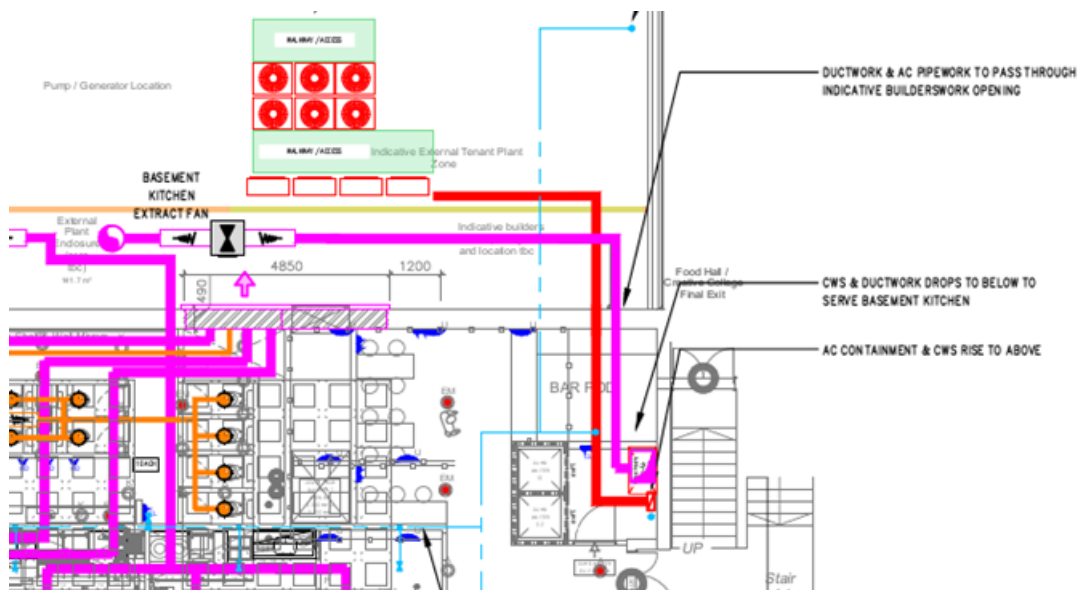

Figure 3: External Extract louvre - Ground Floor level (extract from QS4669/JH/M02)

The proposed openings through the slab are essential to ensure that the basement area can be provided with the required levels of ventilation to operate as a College and separate kitchen area.

1.4 Public Address (PA) System Position

Following the consultation with MCC regarding the position of the PA system in New Century Hall, the concerns of the Planning and Conservation Officers were taken on board and the strategy was revised. The client is incredibly keen to preserve the historic and architectural significance of the building and therefore has had further consultations with their acoustic consultant and sound designers to determine the best solution to reposition the speakers away from the front of the murals, whilst still retaining the desired sound quality.

The design team felt that the main speakers could be repositioned slightly to the left and right of the murals as shown on drawing 4046-F02-002. While this does slightly compromise the quality of the sound provision in the hall (which is important from the perspective of the educational experience this will provide for students of the College), this is a compromise which is considered to be a suitably balanced approach to ensure that the proposals do not affect the visibility of the murals.

A detailed methodology on the fixing of the PAs will be submitted to MCC during determination to ensure they are installed in an appropriate and sensitive manner.

2 Proposed Amendments

Condition 2 – Approved Drawings

The table below summarises all the revised drawings submitted as part of this application which supersede the originally approved drawings. We request that Condition 1 of the new Decision Notice is revised to reflect these changes.

N/A	PA Speaker Location 4046-F02-002

Condition 3 – Materials

As a result of the above proposed changes, a number of amendments and additions have been made to the previously submitted materials tracker, and a revised version is submitted alongside this application. As such, the proposed amendments to the wording of the Condition 3 is suggested below in **green (bold)** text.

*Final and outstanding details of the materials as detailed in the **Materials Tracker Rev F Rev G** dated ~~03-06-24~~**[submission date]** shall be submitted and approved in writing by the City Council as local planning authority in accordance with the programme set out in that materials list and prior to works relating to those items commencing on site.*

3 Summary of proposed amendments

The proposed amendments do not materially alter the massing, quality, or proposed use of the building. The outstanding detail will be dealt in line with the proposed time triggers.

The proposals will contribute towards the successful delivery of this development. Approval of the proposals would therefore support planning and regeneration benefits associated with the New Century Hall refurbishment, and the wider NOMA estate. Without these elements of the tenants internal fit out works, the proposed use of the building may become unviable, and therefore detract from the NOMA estate. For this reason these works are essential.

4 Consultation

This application for an updated scheme is submitted following pre-application consultation with the Local Planning Authority. An on-site meeting was held with the Planning Authority 10th August 2021 at which the amendments proposed were discussed. It was agreed that all of the changes proposed could be progressed as a Variation of Condition Application to the existing consent.

5 Planning Policy

The key Development Plan documents remain the 2012 Manchester Core Strategy and Saved Policies of the Manchester Unitary Development Plan (UDP). Policy EN3 of the Core Strategy notes MCC *“will encourage development that complements and takes advantage of the distinct historic and heritage features of its districts and neighbourhoods, including those of the City Centre”* and states *“proposals which enable the re-use of heritage assets will be encouraged where they are considered consistent with the significance of the heritage asset”*. Core Strategy Policy CC9 also highlights that proposals should protect or enhance the heritage assets that have been identified, including listed buildings.

Saved UDP Policy DC19.1 (Listed Buildings) sets out that in determining applications for listed building consent or planning applications for development involving or having an impact on buildings of Special Architectural or Historic Interest, the Council will have regard to the desirability of securing the retention, restoration, maintenance and continued use of such buildings.

The latest National Planning Policy Framework (NPPF), published in 2021 is a key material consideration in regard to this application. The 2021 NPPF addresses the importance of design quality in new developments. Paragraph 130 of the 2021 NPPF states that: *“local planning authorities should seek to ensure that the quality of approved development is not materially diminished between permission and completion, as a result of changes being made to the permitted scheme.”*

It is considered that the proposed works will facilitate the long-term re-purposing of New Century Hall. Great care has been taken to minimise heritage harm. On this basis the proposals are considered to result in *less than substantial harm* under the National Planning Policy Framework paragraph 196 which is outweighed by the significant public benefits they have in allowing the active use of the building. Paragraph 015 of the Design: Process and Tools section of the National Planning Practice Guidance states that *“it can also be important to ensure that applications to discharge conditions or amend approved schemes do not undermine development quality.”*

New Century Hall represents one of Manchester’s iconic music venues which was utilised by the Co-operative movement for at least five decades. The building became vacant following the move by the Co-operative Group to new headquarters 1 Angel Square in 2013, and has remained vacant ever since. The creative College will bring the building back into active use in a way that honors this legacy by providing a

unique facility which bridges the gap between vocational music education and performance. These amendments are vital in securing the optimum operational quality of the proposals to ensure the building can fulfil its potential.

The College provides an opportunity to provide a niche educational provision through a variety of creative vocational courses, supporting MCC's priorities in increasing opportunities for young people in the city. The tenant brings over 28 years' experience in vocational education to provide a world class creative institution to nurture the future pipeline of talent within the creative and technology sector. This is vital to the city's economic growth, in addition to serving the student demand for vocational courses and offer a second to none education facility in the heart of NOMA. The music hall will be opened up for public performances, allowing for both appreciation of the listed asset, and enjoyment of the live music experience in keeping with the original use of the building.

Therefore, the approval of the proposed amendments would deliver public benefits in themselves and also support the economic and social benefits associated with the proposals as a whole and are supported by planning policy objectives at national and local levels.

6 Application Documentation

The following documents are submitted in support of this application:

- Completed Variation of a Condition application form;
- Amended and new drawings and documents as summarised in the tables above.

The Application has the Planning Portal reference: PP-10345447 and the application fee will be paid online.

On the basis of the information submitted, we seek your agreement that the proposed amendments are acceptable and can be dealt with as a non-material amendment.

I would be grateful for written confirmation of receipt and registration of this application. If there are any points of clarification required, please do not hesitate to contact me or my colleague Frances Hampson (fhampson@deloitte.co.uk / 0161 455 6766) or Eithne FitzGerald (eithnefitzgerald@deloitte.co.uk / 0161 455 6963) if you have any questions or require any further information.

Yours sincerely

Deloitte LLP
