Details

If you have a headlap of 75mm or 100mm then using the Marley Modern will not be a problem at all when looking for a single lap flat tile as an alternative to standard plain tiles. Using a broken bond laying pattern, it gives passes by the stunning effect of an almost slate like appearance without the slate prices. for extensions, home restorations and of course new builds it is an incredibly versatile, reliable and solid option too.

Aesthetically Pleasing- Not just a great option in terms of reliability, but also very pleasing to the eye, giving the impression of traditional slate and showing off it's true quality.

Environmentally Friendly- While some roofing systems in the past have not been the most environmentally friendly options, the Marley Modern Tile is certainly a more eco friendlier choice since it is made from concrete.

Colour Variety- The Marley Modern Tile is also available in six beautiful colour options, ensuring you are able to match in to your existing build, or with other houses in the street. Some Colours varying from smooth or granular, depending on which you choose.
