A large capacity for the production of bespoke architectural cladding

OUR WORK

Client:	LaSalle Investment Management
Main Contractor:	Skanska
Architect:	EPR
Sector:	Commercial
Scope of works:	1500m ² of GRC fins, column encasements, spandrels, doors and flat panels.

60 London Wall in the heart of London is being extensively refurbished, reconfigured, reinvented and repositioned to provide high quality modern office space and a prime retail offering at ground floor level. Working for Façade subcontractor Permasteelisa, GRCUK supplied 1500m² of GRC fins, column encasements, spandrels, doors and flat panels to the externals of the building.

60 LONDON WALL, LONDON

TECHNICAL INFORMATION

Glass fibre reinforced concrete is a particularly versatile type of concrete. It is formed in the same way as precast concrete, using bespoke moulds, but can be made in thinner sections that result in lighter components.

Click the red box for more insight on how we do it.
