Street Naming & Numbering Requirements

Manchester City Council is responsible for allocating street naming and numbering within Manchester for new developments or property conversions. Individuals or businesses are not permitted to allocate their own property numbers, building or street names.

If your development includes the creation of new dwellings (either new build or conversion of existing buildings), creation of new commercial properties or the subdivision of existing properties you must ensure that you request new or changes to addresses through us so they can be officially allocated and registered in accordance with the Public Health Act 1925 Sections 17-19 & Greater Manchester Act 1981 Section 22.

Failure to do this may result in difficulties for the developer/occupier when requiring services such as connections to utilities, phone lines and postal services and may delay your development.

Mining Information

The proposed development lies within an area which could be subject to current coal mining or hazards resulting from past coal mining. Please read the Standing Advice from the Coal Authority in Appendix A.

Any requirements for licensing, hoarding / scaffolding, skips and any associated temporary traffic management arrangements will need discussion and agreement with the council's Highway Applications and Network Resilience teams via Email -highwaylicenses@manchester.gov.uk

Continual monitoring and management of parking demands is recommended, in order to ensure there is no adverse impact generated from the loss of car park spaces on the highway network.

Any diversions of pedestrians and cyclists during construction, should be managed by the contractor.

The management of such areas is essential to encourage active use and enjoyment, whilst making abuse less likely to occur.

It is important that materials are sealed, protected and/or supports the removal of graffiti. In general a robust management & maintenance strategy should be developed. Signage should be provided to make users aware that motorcycle use is prohibited and with the relevant contact telephone numbers to report such use.

Entrances to the footpath/cycle route should be linear and wide to accommodate sightlines and allow users to view any potential threats. Shrubbery close to entrances should be maintained at a low level (i.e. less than 1000mm) and tree crowns should not fall lower than 2400mm. It is recommended that shrubbery and trees along the route is maintained to a similar standard to reduce opportunities for concealment.
