Ventilation -	EXTRACT SYSTEM. UNSEALED AS NECESSARY
Hygiene -	ALL SURFACES TO BE INSPECTED AND ROUTINE CLEANING CARRIED OUT.

Please provide details of who will be responsible for placing the bins at the collection point and returning them to the store / property promptly e.g. resident / management company

PROPERTY OWNER

Please ensure that you have attached:

Detailed plans of waste stores	☐
Location plans showing stores	☐
Location plans showing the proposed collection point and the route the collection vehicle will take	☐

COLLECTION POINT ON CARILL GARDEN EAST AT
END OF PASSAGE

Please ensure that you have completed this form in accordance with our GD04 Waste Storage and Collection Guidance for New Developments

Waste Management Strategy

In producing this document we have attempted to explain the waste disposal strategy which we intend to apply to this development. As a company we have sought and taken advice from "Fresh Start Waste Services Ltd" and various other parties. We recognise the need for an effective and environmentally sound waste disposal policy and its benefits for the development and the surrounding environs. The bullet points below give a brief outline of what we intend to do to ensure a successful and environmentally friendly development

Please note at present there are is adequate storage facilities for waste on site

1. Container storage areas are identified on the plans which will be large enough to take the mainly cardboard and wrapping waste. Waste Food storage will be provided in the rear car-park yard area in the storage compound as indicated on the plans with frequency of removal of all waste subject to usage with collections available with-in 24hours of telephone call to Fresh Start Waste Services Ltd
2. It is not envisaged that the unit will be used for food production or that any animal by-products will be stored on site.
3. Designated storage areas will be clearly defined and marked to ensure all waste is stored in the correct container
4. The storage area has been designed to be easily accessible for removal of containers with no necessity for containers to be moved to another collection point
5. All containers will be sealed to avoid spillage and monitored by staff to ensure correct usage and removal
6. All different types of re-cycling containers will be enforced with literature pointing out the legal requirement and benefits of the same will be available
7. Site staff will be available to ensure monitoring of collections and to ensure any breaches in waste disposal policy is dealt with quickly with no delays to the collection procedure
8. Collection vehicles will be able to get within 15m to the storage area and have specific times for collection as required including additional collection times
9. All collection and storage areas are on level ground
