

Youles Honda Manchester

Waste management strategy

Commercial development

General waste

There will be some general waste created ie dust from cleaning packaging (not pulpable) plastic wrapping that motorcycles are delivered in etc. This will be collected in a 240ltr capacity bin and collected by

Suez

Suez House

Grenfell Rd

Maidenhead,

Berkshire

SL6 1ES

Bin to be located in compound in area marked "Waste area"

Cardboard Palapable materials

To be collected in 240 ltr bin supplied by

Cardboard

EMERGE

Units E1-E5

New Smithfield Market

Manchester

M11 2WJ

Collections weekly

Waste oil, Batteries, Oil Filters

To be kept in bunded tank 1000 ltrs located in waste area collected when full. Pure Clean also provide. Waste oil filters and batteries will be stored internally as motorcycle batteries and filters are quite small unlike car.

Oil, batteries, oil filters and coolant

Pure Clean Waste Solutions Ltd

Old Moor Road, Bredbury

Stockport, SK6 2QE

Scrap Metal

There will be a minimal amount of scrap as unlike other brands Honda use a reusable stillage to deliver their motorcycles in. This will reduce significantly the amount of scrap metal we generate at

this site. However we will provide a small metal stillage to collect scrap in this has a volume of 500ltrs

This will be provided by

Scrap Co metal
Scrap Co garage collections

Waste Tyres

Waste tyres again will be stored internally. Similar to cars there are specialist Motorcycle tyre fitters therefore the quantities we produce are minimal. Collection will again be as and when required via

AC Tyres 07593 194 479
Yard 2
Millingford Industrial Estate
Bridge Street
Warrington
WA3 3QE

The workshop Manger will be responsible for ensuring that waste doesn't stockpile and interfere with the environment. Access will be through the locked gates into the workshop that will be fitted with a coded lock.
