Subject: Re: Nelson Mandela Court, M16 8FY

Hi Andrew and Lisa I have been and viewed the tree and would estimate the tree to be around 35-40 yrs it is a cherry tree and as a large span of root activity actually travelling and reaching the buildings foundation. Condition is good but roots are effecting paving raising flags and have reached the main building!

Estimated section felling to ground level quote with removal of arisings £XXX.XX plus vat

If stump grinding all understorey shrub would have to be cut down and removed also grinded out and because of travel of root much of the grassed area would be lost it I needed to chase all main leaders out also price would be grinding and no removal of grinding material from site simply back filled and levelled
£XXX.XX plus vat
