

Proposed Extension to Industrial Unit

Claytonbrook Road Planning Ref 131081/FO/2021

Energy Efficiency Statement

The proposed development is to extend an existing commercial building which is used for storage and distribution of ambient food products.

The building will be constructed to current Building Regulation standards whilst the proposed extension will not be heated the thermal elements of the building roof walls floor and external doors will be insulated to the elemental values in Part L of the regulations.

Natural lighting will be provided through rooflights, artificial lighting will be provided using low energy LED lighting with a passive infrared control system .

These provisions will limit the amount of energy used within the building.
