Hi Ian,

hope you are well. I have received the City arborist report below which I have included in full with contact details in case you wish to discuss further directly with Rudi. Can you let me know if the recommended pruning works in the report are acceptable to you, or what has been agreed following further discussion with the city arborist team, and provide a revised pruning specification.

Best regards, John

Subject: 15 Delaunays Road - 130766/TCA/2021

John,

15 Delaunays Road - 130766/TCA/2021

The tree in question is close to the property and does need some form of management which it appears to have had over the years, however, a 5m crown lift, accompanied by a 30% crown reduction and all lateral branches on the property side, being reduced back to the stem, would leave the tree in very poor shape.

I have marked out a rough pruning guide on the image below, which I think would keep the tree away from the property and still contribute to the street scene.

Given the trees current position and proximity to the property, I wouldn't recommend the tree for TPO status, so I think it would be best to work with the applicant to get the best out of the tree and still alleviate their concerns.
